PARTS & ACCESSORIES

KIMPEX
ROUSKI

KIMPEX.COM

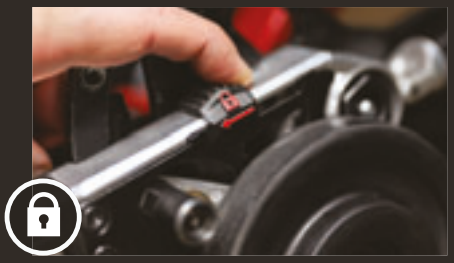
PATENTED PENDING

WHY STRAIN YOURSELF?
THE ROUSKI EVO WORKS FOR YOU!

Remaining as efficient as ever to protect your runners and facilitate off-trail riding, the **Rouski EVO** features an easier-to-engage system, which is compact, lockable, and better integrated.

EASIER
TO ENGAGE

Foot operated, it multiplies the pushing force x 8.



THE FIRST FULLY
LOCKABLE SYSTEM

Lock the wheels ↑or↓. Move forward, backward, load, store.

UNIQUE
TWO-PART DESIGN

Universal Rouski EVO
+ Ski adapter
= Inventory management made easy!

Dear Partner,

Always willing to provide you with the industry's best, Kimpex is presenting you with its **2024 Snowmobile Parts & Accessories catalog**. This is a must-have reference tool to find everything that will satisfy the needs of the most demanding of snowmobile enthusiasts.

While browsing through the content, you will find all the products you value season after season, as well as many new ones. Feel free to browse through the different sections of this catalog to familiarize yourself with our exceptional and diversified product lines.

Want to maximize your profits? Visit order.kimpex.com to consult the **Restocking Program**. For more information, contact your representative.

Be ready for this season to come!

Kimpex, your partner of choice

Flywheel OEM Replacement BRP

KIMPEX is offering a new replacement flywheel for your Ski-doo. This flywheel can be used as a direct Replacement to the OEM.

Ski-doo 1200 snowmobiles are plagued with problems on the original flywheels. The additives in the motor oil were dissolving the epoxy that holds the magnets in the flywheel, causing them to detach and scatter throughout the engine.

Solution: Seal that protects the magnet's epoxy from oil additives.

Starters & Components

Starters

- The replacement starter meets or exceeds original manufacturer specifications
- 100% oem interchangeable, no modifications needed or installation
- Double sealed housing, keeps dirt out for longer service life
- 90/10 copper bushings and heavy duty needle bearing for longer life
- 100% electronically tested insulated armatures
- High quality magnets to provide more starting torque
- Solenoids have 100% copper windings and terminals for consistent starting connection

Voltage Regulator

225721

345188

225665

Instructions

01-154-16:
1. Attach yellow wire to OEM yellow wire
2. Attach red wire to OEM red wire
3. Attach black wire to ground chassis (Ground)
4. Attach yellow wire to green wire on OEM engine wiring

01-154-17:
1. Attach black wire with yellow line to the run non-regularized positive.(+)
2. Attach black wire to the run non-regularized negative.(Ground)
3. Attach the yellow wire to the regularized positive output circuit.
4. Attach the other yellow wire to the other regularized positive output circuit.
5. If it Is not necessary to connect the second positive output, it should be to protect this output to avoid any contact with other parts and damag that may result.

Attention: This A/C voltage regulator must be Installed on snowmobile having manual starter only.

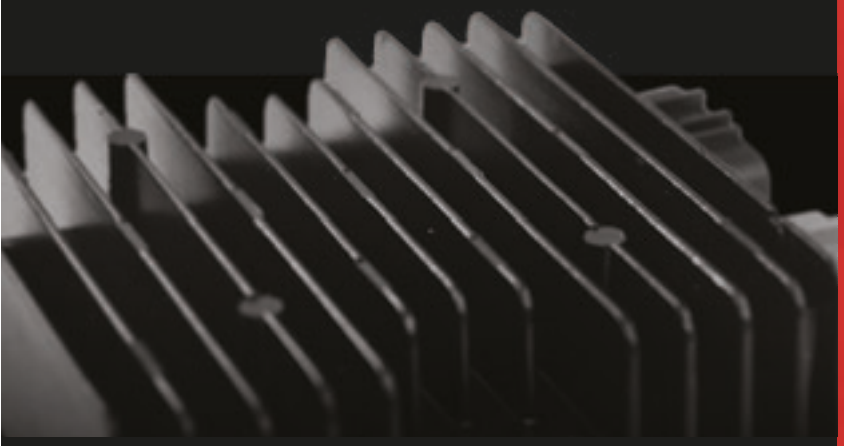
STOP BURNING YOUR REGULATOR!

It's time to update or replace your voltage regulator with advanced Mosfet technology. This modern concept, ultra-reliable can handle up to 50 amps peak and 30 amps continuous 3-phase, single phase 30 Amps and runs cooler than all OEM regulators diodes. In addition, this rectifier has a protection against overheating, rather than burning it off for a while to cool off.

WHY USE *MOSFET* ENHANCED TECHNOLOGY?



Runs cooler
Runs much cooler than the traditional Shunt type voltage regulator.

Extended battery life
Extends the battery's life and cold cranking capacity.

Optimized power
Optimizes power delivery by switching the stator coils on or off.

Saves gas
Less load on the stator, less work, less fuel is used and you save.

Regulated energy
The energy regulated by the Mosfet voltage regulator is much cleaner

More engine power
Remove stator load resulting in more engine power.

Mosfet Voltage Regulators

- Direct replacement to your original unit
- Plug-and-play, direct fit, easy installation
- The Quality exceeds the OEM equipment
- Improved heat sink and charging capabilities
- Handles up to 50amp peaks and 30amp continuous 3 phases, 30amp single phase
- Higher grade of electric components
- All products shipped are tested
- One year limited warranty

LED Remix Night Cruiser V-Bar

This product speaks for itself, a must have for the night rider who wants a unique look to set their machine apart from the others. This LED is completely waterproof and built using the highest quality components from the LED's to the heat resistant Powder coated housing. The Night Cruiser is available with Plug and Play OEM matched connectors or a universal configurations for any vehicle with a battery or charging system. Simple and easy installation can be installed in under an hour, comes complete with mounting hardware wiring harness On/Off switch and instructions.

- V-Bar Designed to be mounted on the nose cone above the bumper or used with Straightline Performance front bumper.
- Night Cruiser Remix uses an IOS or Android mobile device to Control the LED light color. Which can be changed infinitely between colors and strobe patterms.
- Remix can also be synchronized to music downloaded on your smart phone.
- Smart Phone App allows the user to control REMIX Night Cruiser LED Color abd Strobing effects.
- With Part 141-104 LED can be run when machine is off (Requires Factory installed battery)

Halogen Bulbs

H.I.D. High Intensity Discharge Lamp System

Xenon-gas-filled headlight bulbs, which produce a super-white HID-type headlight beam.

The lenses have been optically dyed to transform the light into intense white beam which simulated the appearance of H.I.D. lighting system and produce superior, super-trick lighting over standard, dull headlight.

HID lighting provides the brightest illumination available. The more intense, higher color temperature light results in three times the output of standard halogen lighting, which means improved peripheral vision and enhanced down-road visibility. The end result is safer driving for everyone on the road.

All twin packages are in a reusable "Tuff Pak" storage case.

Halogen Bulbs

KIMPEX

Halogen Bulb -Type H3

(Single Filament Halogen Lamp: Transversal Filament)
For replace OEM bulb headlight.

Part No.	Spec.	Description
004743	55W	Regular

Halogen Bulbs - Type H4 P43T

Double Filament Halogen Lamp: Asymmetric Type) Replace OEM No. Arctic Cat 0109-735, 0609-693, Polaris 4030028, 4030048, 2870448, Ski-Doo 410-504-401, 515-176-274, Yamaha 8G9-84314-00, SV2-84314-00, 8FP-84314-00.

Part No.	Spec.	Description
911206	100/55 W	Blue - Pair - Xenon
911166	60/55 W	Regular
901167	T100/80 W	Regular
411206	100/55W	Clear

Halogen Bulb -Type H7

(Single Filament Halogen Lamp: Axial Filament)
For replace OEM bulb headlight.

Part No.	Spec.	Description
911231	55W	Regular

Halogen Bulb -Type GE886, Polaris

Replaces OEM No. 4010253

Part No.	OEM No.	Description
192242	GE886	Halogen Bulb

Halogen Bulb -Type H13, Polaris

Replaces OEM No. 4012279

Part No.	Spec.	Description
192245	60/55W	Halogen Bulb H13

Light Bulbs

S6 Series LED Bulbs

- Adjustable 360 degrees to install without any modifications
- No moving parts to reduce the risk of failure
- Power: Comparable to 6000 lumens per bulb
- Robust aluminum construction
- 100% waterproof, resistant to mud, snow, shocks, vibration and dust
- Operating temperature: -40 °C up to +80 °C
- Color: Cold white is 6500K
- Operating voltage: DC 9-32V
- Operating life: 30,000 hrs
- Warranty: Limited lifetime warranty

Part No.	Bulb Type
403061	H1
403062	H3
403063	H4
403064	H7
403067	H10
403068	H11
403069	H11B

Part No.	Bulb Type
403070	H13
403071	880
403072	9004
403073	9005
403074	9006
403075	9007

Spark Series LED Bulbs

- Over 1250 lumens each
- Installs everywhere
- Strong aluminum body
- Projected light beam pattern
- Operating temperature: -40 °C up to +80 °C
- 2 times less expensive than an LED kit
- Color: Cold white is 6500K
- As easy as installing an original bulb
- Operating life: 30,000 hrs
- Warranty: Limited lifetime warranty

Part No.	Bulb Type
403077	H1
403078	H3
403080	H7
403081	H8
403082	H10
403083	H11
403084	H16

Part No.	Bulb Type
403085	9005
403086	9006
403088	880
403089	881
403090	PSX24
403091	PX15D

Light Bulbs

B2 Dual Color Snow/Fog Series LED Bulbs

- Adjustable 360 degrees to install without any modifications
- No moving parts to reduce the risk of failure
- Up to 10 times more powerful than the original halogen bulbs
- Material: Robust aluminum construction
- 100% waterproof, resistant to mud, snow, shocks, vibration and dust
- Operating temperature : -40 °C up to +80 °C
- Color: Cold white is 6500K and platinum yellow
- Operating voltage : DC 9-32V
- Operating life : 30,000 hrs
- Warranty : Limited lifetime warranty

Part No.	Bulb Type
403182	H4
403183	H13

Mini Series LED Bulbs

- Superior brightness with 800 lumens each
- 360° LED chips and on the top
- Robust aluminum construction
- Operating life: 30,000 hrs
- Warranty: Limited lifetime warranty
- Operating voltage: DC 9-32V

Part No.	Bulb Type
403094	194
403095	921
403099	3156 - Amber
403104	7443

Smart Decoders

The smart decoder is used when the vehicle's computer performs a verification of the original bulbs to inform the driver of the fault using a display in the dashboard of the vehicle.

- Allows control of the manufacturer's anomaly detectors.
- Allows to stabilize power from car's computer to the LED bulb.
- Stabilizes the output voltage to +/- 2%. With identical connectors to those used by manufacturers which allows quick and easy installation.
- Operating capacity of 8-24v dc.
- In a robust water-resistant box superior to ip68 standards.

NGK Spark Plugs

Standard Spark Plugs

- OEM Quality
- Triple-Gasket Sealing Process
- Consistent Performance
-Plug of Choice in Millions of Vehicles

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

V-Power® Spark Plugs

- Lowers ignition system voltage requirements
- Greater ignitability and performance over conventional spark plugs
- "Trivalent Metal Plating" has superior anti-corrosion and anti-seizing properties
- Increased fuel economy and lower emissions
- Highly durable against electrical and chemical wear
- Good performance spark plug

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

G-Power® Spark Plugs

- Fine platinum tip reduces required voltage
- Extremely durable under high heat
- Trivalent Metal Plating - superior anti-corrosion and anti-seizing properties
- Faster starts and quicker acceleration
- Better fuel economy and lower emissions
- Best platinum spark plug at an economical cost

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

Iridium IX® Spark Plugs

- Fine Iridium tip ensures high durability and a consistently stable spark
- Iridium alloy has extremely high melting point, perfect for today's high-tech, high-performance engines
- Trivalent Metal Plating - superior anti-corrosion and anti-seizing properties
- Outstanding acceleration, high fuel efficiency and durability
- Ultimate design, technology and performance.

NGK Spark Plugs

Laser Platinum® & Laser Iridium® Spark Plugs

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

- Laser welded Platinum or Iridium center electrode tip
- Platinum disc welded to backside of ground electrode provides long life
- Trivalent Metal Plating provides superior anti-corrosion and anti-seizing properties
- Faster starts and quicker acceleration
- Better fuel economy and lower emissions
- Best spark plug available in their category
- Original Equipment Manufacturer approved design

Racing Spark Plugs

To withstand the severe conditions that occur in racing engines, NGK Racing Spark Plugs feature electrode materials and configurations as follows:

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

- **Electrode materials**
  Many use precious metals such as platinum or gold/palladium for greater durability and lower voltage requirements.
- **Electrode configurations**
  Fine-wire center electrodes provide better sparking and enhanced ignitability. Fine-wire ground electrodes further improve the ignitability of the plug.
- **Ensulator configurations**
  Special configurations are used for the insulator noses to improve throttle response.

Description	Iridium (ir)	Platinum (Pt)	Nickel (Ni)	Gold (Au)	Silver (Ag)

Spark Plug Caps

Part No.	OEM No.	Description
058107	LB05EP/Z	Spark Plug Cap 5 OMH
058118	TB05EMA	Spark Plug Cap Silicone 5 OMH

Colored Spark Plug Caps, NGK Style

A very popular model of plug cap used on snowmobiles, motorcycles and many other applications. Sure-fitting waterproof, soft molded rubber. Assorted colors.

Part No.	Description
280309	Red
280310	Blue

Spark Plug Case

Soft plastic plug case for safe storage of any 14 mm or 18 mm plugs.

Part No.	Description
284014	Rivet Mounted Plug Caddy - 2

Spark Plug Connectors with cable

Universal with 29'' long, 7mm Ignition Wire.

Part No.	Description
280440	Spark Plug Connectors with Cable

KIMPEX

THE KIMPEX BATTERIES.

POWER AND RELIABILITY AT THE BEST PRICE.

ISO 9001 & ISO 14001

Battery at the best price-quality ratio

Optimal starting power at all times

Available in several popular versions (dry, sealed, factory activated)

Offering standards of quality equivalent to the best-known brands

Super Performance Lithium Ion Battery

The lithium Ion Battery is a great powersport replacement battery if you want to improve the performance of your powersport vehicule. The super Performance Lithium Battery is the mst environment friendly battery chemically available.

- Less Weight and Volume: 1/3 of normal Lead-acid battery
- Non-spill : no acid inside, no leak
- No-pollution does not contain any acid and heavy metals such as lead, cadmium, hydragyrum (mercury)
- Non-explosive and non-combustible
- Quickly rechargeable with big current: rechargeable with 13 amp current and 90% recharged within 6 min
- Excellent Cycle life: More than 2000 cycles under JIS-D standard (Lead-acid only 150-300 cycles)

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

Factory Activated Maintenance Free Gel Battery

Kimpex's Gel batteries are the ideal replacement of all kinds of Lead-acid Batteries.

- Large thermal capacity and strong heat dissipation capability of Gel electrolyte avoids thermal runaway, which is easier emerged by the acid Maintenance Free Battery.
- Well-distributed specific gravity of the Gel electrolyte and no stratification phenomenon solves initial capacity reduction problem of acid Maintenance Free Battery.

**** Can be ship by air***

FAST LANE ORDER.KIMPEX.COM

Factory Activated Maintenance Free Battery

The most convenient batteries for users are Kimpex' Factory Activated Maintenance Free Battery. The battery is absolutely ready to go when people buy it.
They are perfect flexibility to fit demanded install positions.

- Special permanently sealed container design allows the battery to be installed in any position other than upright.
- Complete factory acid filling process ensures safety and non-pollution.
- Professional factory charging process enlarges cranking power by 10% more than Dry Charged Maintenance Free batteries.

**** Can be ship by air***

Maintenance Free Battery

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

This is too valuable to waste on maintaining batteries. Kimpex's Maintenance Free Batteries would allow them to completely free up from the boring battery maintenance duties. People just need to fill the battery with acid, install it on the motorcycle and then forget it (regular charging is still necessary).

- Advanced lead-calcium technology promotes the cranking power, never requires refilling, half shelf discharge rate compared to conventional batteries.
- Special additives in the electrolyte retards plate sulfation.
- Lean liquor design prevents the battery from leaking.

**** Cannot be ship by air***

Heavy Duty Battery

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

It is common for consumers always seeking power along with more cranking power, longer life and excellent vibration resistance. Kimpex's Heavy Duty Batteries reach these entire requests as follows:

- Enlarged plate area delivers up to 30% more cranking performance.
- Special separator design provides longer life.
- Tight assembling technology enhances vibration resistance.

**** Can be ship by air***

Conventional Battery

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

It standard usage and reasonable cost are the most important factors when looking for a replacement battery, then choose Kimpex's Conventional Batteries. They provide plenty of capacity, great cranking power and long life base on an unbeatable price.

- Thru-partition construction provides less internal resistance and great cranking power.
- Special alloy technology and advanced lead paste design enables plenty of capacity and long life.

**** Can be ship by air***

Yuasa Battery Characteristics

YUASA BATTERY

Conventional Battery

Original Equipment in most machines.

- Special thin separators – allow two extra plates per cell to be installed, for a 30% improvement in cranking performance
- Engineered to protect against corrosion, withstand vibration, and deliver high cranking power
- 6 volt and 12 volt varieties available

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT **ORDER.KIMPEX.COM**

YuMicron

Personal watercraft, snowmobiles and ATVs make special demands – and YUASA's YuMicron Battery meets them head-on. The high-tech, power-boosting design also makes YuMicron ideal for accessory-laden touring bikes and modified machines.

- **Heavy-duty glass** mat resists vibration damage
- **Special thin YuMicron Separator** packs in extra plates, delivers up to 30% more cranking power than conventional types
- **Through-the-wall intercell connector** minimizes internal resistance, maximizes power
- **Sulfate Stop** curbs plate sulfation – and provides longer life

Maintenance Free Absorbed Glass Mat (AGM)

Absorbed Glass Mat (AGM) Technology is an advanced battery design that eliminates water loss. Once it's filled with acid, you'll never need to fill it with water or check the acid level.

Long Life
Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.

And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Non-spillable
Once filled with acid from its special packs, the AGM battery is virtually maintenance free. All of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on the valuable vehicle parts and accessories.

YUASA BATTERY

Yuasa Battery Characteristics

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT ORDER.KIMPEX.COM

Factory Activated Maintenance Free VRLA (AGM)

Sealed VRLA (Valve Regulated Lead Acid) means a battery that's perfect for people who have better things to do than battery maintenance! Our permanently sealed VRLA battery never needs refilling; however, it still needs periodic charging. Ideal for motorcycles, scooters, ATVs, riding mowers and personal watercraft.

- Spill-proof design means virtually no possibility of leaks
- Advanced lead-calcium technology pumps up starting power
- Sulfation retardant dramatically reduces battery-killing plate sulfation
- And, sealed VRLA batteries hold voltage longer and need less charging zin standby or storage mode
- Selected types also available in Factory Activated (filled, sealed and charged at the factory)

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT ORDER.KIMPEX.COM

High Performance Maintenance Free (AGM)

If high power is top priority in a replacement battery, look to Yuasa's High Performance Maintenance Free batteries. Yuasa means more power, less maintenance and longer life. Yuasa's High Performance Maintenance Free batteries are your best choice for motorcycles, utility vehicles, scooters, ATVs, riding mowers, personal watercraft and snowmobiles.

- No spilling, no leaks, no water to check and topping off is a thing of the past
- Increased power and up to 30% more cranking amps than YuMicron thanks to a radial grid design and additional plates
- Long lasting which means Yuasa's High Performance Maintenance Free batteries will last up to three times longer than conventional batteries
- Exceptional resistance to vibration makes Yuasa the most reliable battery on the market today

High Performance Maintenance Free Batteries fit:

YTX14AH-BS – 60+ applications including motorcycles, utility vehicles, ATVs, snowmobiles and riding mowers. (Upgrade for YB14-A2, YB14-B2, YB14A-A1, YB14A-A2)

YTX14AHL-BS – 120+ applications including motorcycles, ATVs, snowmobiles and riding mowers. (Upgrade for YB14L-A2, YB14L-B2, 12N14-3A)

YTX20CH-BS – 9+ applications including motorcycles and ATVs. (Upgrade for YTX16-BS)

YTX20H-BS – 10+ applications including motorcycles, personal watercraft and riding mowers. (Upgrade for YTX20-BS)

YTX20HL-BS – 55+ applications including motorcycles, utility vehicles, ATVs, personal watercraft and riding mowers. (Upgrade for YTX20L-BS)

YTX20HL-BS-PW – 30+ applications including utility vehicles, ATVs and personal watercraft, ATVs. (Upgrade for YB16CL-B)

YTX24HL-BS – 45+ applications including motorcycles, ATVs, snowmobiles and riding mowers. (Upgrade for 50-N18L-A, Y50-N18L-A3, Y50-N18L-A-CX, SY50-N18L-AT)

Terminals

YUASA BATTERY

Terminal shapes vary from one battery to another. By identifying the correct replacement battery from the listing in this book, you are assured of the proper terminal configuration. For custom applications, refer to the following chart to identify terminal shape and corresponding batteries.

Terminal Shape				Battery type				
Type	Front	Side	Top					
1				YB7C-A YTX16-BS-1	YB14L-A1			
2				YB9L-A2 12N5.5-4A	YB16AL-A2

KIMPEX

Battery Accessories

12V Battery Charger

- Ideal for charging gel batteries, WET, AGM, deep cycle type calcium, VRLA, lead-free maintenance
- Smart Microcontroller
- IP65 Waterproof: The waterproof cover makes you use the charger everywhere.
- Reversed Hook-up Protection
- Sparkproof
- Quick Disconnect Harness
- Long battery life
- All products are tested
- One year limited warranty

Part No.	Description
225522	Smart 12V Battery Charger

Battery Tender

THESE PRODUCTS ARE ONLY AVAILABLE TO REGISTERED BATTERY TENDER RESELLERS
DELTRAN-GLOBAL.COM/RESALEPARTNER

Waterproof Battery Charger 800

- Waterproof 12 Volt 800 mA Charger
- Fully Automatic
- Spark proof, vibration and shock resistant
- Reverse polarity protection
- State of charge indicated by 2 led lights
- 3 year warranty

Part No.	Description
900605	Battery Tender® Waterproof 800 Charger

YUASA BATTERY

Yuasa Jumper Cables 8 feet

- Heavy duty 8 foot long and 8 gauge cables.
- Rubber covered grip for safety.
- Comes complete with a convenient storage bag.

Part No.	Description
010208	8 feet long

KIMPEX

Battery Clips

Spring loaded copper plated 3" battery clips commonly used for aerators and portable lights. Color coded coated handles. 15 Amp.

Part No.	OEM No.	Description
745155	51008	15 Amp.

Battery Tester

Universal 12V Digital Battery Tester / Charging System Analyzer

Micro-processor controlled. It provides a quick reading to determine if a vehicle battery needs a jump or replacing.

- Provides check the Alternator's charging and Starter's cranking conditions. Vehicle charging system test is also available, including load voltage, unloaded voltage, ripple status and charging system status.
- Test Range - 4-20V DC testing range for all types of 12Volt batteries. (NOTE: If voltage is under 4Volt, the LCD reading is "LO"; If voltage is above 20Volt, the LCD reading is "HI".)
- With LCD Display and LED Indication. LED Indication - Colored LEDs indicate different status of battery or alternator.
- Accurate - With a four-character lighted digital display, this battery voltage tester is easy to read with accuracy.
- Safety Protection - Reverse Polarity, Short Circuit and Overload protections.
- Best Quality - Rubber Paint Housing with 30Amp Alligator Clamps.
- All products shipped are tested

Part No.	Description
225523	Battery Tester

Meters

X-1- Boost Gauge

Today, many horsepower enthusiast are upgrading their engine with Turbo or Supercharger. For this reason, we came up with this basic boost gauge with warning and peak functions.

Made to resist cold temperature, water or dust, this gauge can be adapted to any engines with turbo or supercharger. The changeable scale from 15 to 30 psi, the warning and peak recall function makes it a great tool.

Applications: ATV, Motocross, Scooter, Snowmobile

Material included

Part No.	OEM No.	Description
205137	BA029000	X-1 Boost Gauge

X-2 Boost Gauge

This new multi-function unit is a great tool for all horsepower enthusiast that are upgrading their engine with Turbo or Supercharger. Following many requests, we came up with a unit that combines Boost, air fuel ratio and a temperature function who can be installed on the cooling system or the intercooler. This gauge is made to resist cold temperature, water or dust. It can be easily adapt to any engines with turbo or supercharger. The X-2 instrument will give you precious information to help you pull out more horsepower out of the engine or save it from bad damages.

Material included

Part No.	OEM No.	Description
205139	BA029001	X-2 Boost Gauge
205096	BG001800	Sensor Bung
205095	BG001801	Cap

Mini 3 Air/Fuel Ratio Meter

- A/F ratio Display range : 12.2~17.2
- Effective temperature range -10 ~ 60 °C (14 ~ 140°F)
- Meter standard JIS D 0203 S2
- Meter size (W x L x H) 60 x 30 x 11.5 mm

Lightweight Mufflers

- With more noise conscious environments, we have taken action to make sure we manufacture mufflers that provide a weight loss, maintain OEM performance, and meet or surpass sound restrictions.
- All of this is achieved with no modifications to the original Lightweight ceramic muffler we have been selling for years now, no need to worry about upgrading to the newest latest muffler, as all previous manufactured mufflers are also compliant

03-101

Belt & Clutch Spring

The belt longer and made of better quality material.
The fact that it is longer enables it to operate in an optimum ratio range.
The material used to make it is comparable to that used for high-performance snowmobiles.
Start-ups are more powerful, and without sliding or a burning smell. Premature wear and tear problems are thus a thing of the past.

The replacement spring allows the engine to operate in a better power range. In deep snow, when climbing or hauling a load, the engine speed will operate and remain at a slightly higher speed, which gives it more power.

The new belt/spring combination helps the snowmobile deliver all its power, thereby offering its user more enjoyment with regard to his or her snowmobile's performance.

For 2006 Tundra and Freestyle (Rotax 277, 2006)

Part No.	Description
03-100-01	Belt
03-101	Spring

Powerbloc 80

Available in non-calibrated only, the Powerbloc 80 stands apart by:

- Its capacity to transmit the engine's full power.
- A service life better than the competition.
- User satisfaction.
- Designed for strength.
- A simple design which has 50% less parts than the competition
- Assured reliability.
- 15% to 20% lighter than the other pulleys on the market.
- Good ventilation.
- Uncompromised performances, exploiting engines to their maximum capabilities.
- Made with the best materials.
- Modern manufacturing.
- Precise assembling.
- Maintenance free.

108 4-Pro

Tunable High Performance Clutch

- Most tunable clutch on the market
- 4 Clutch weight increase the overall tunability
- Cover captivates tower and eliminates speading
- Higher heat andwear resistance
- Built to handle high Horsepower engines
- Durability and wear resistance increased

Recommended for:
- *Backcountry*
- *Trail Riding*
- *Racing*

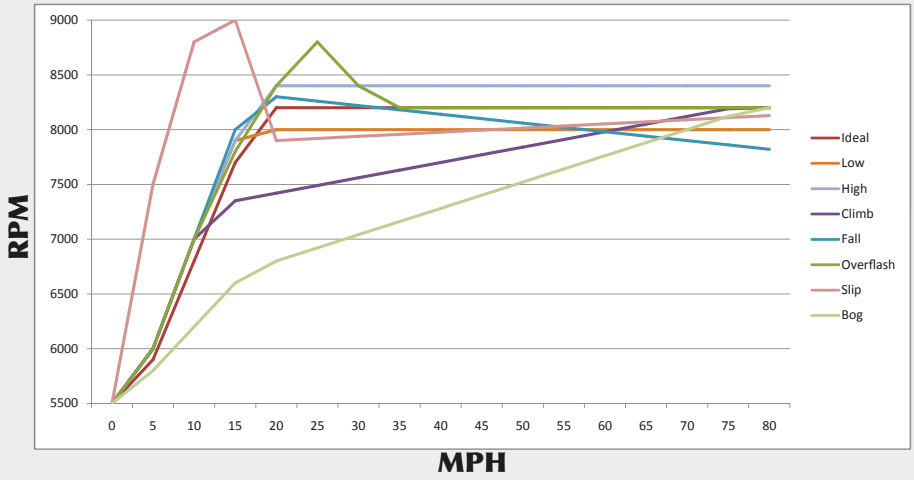
Clutching Troubleshooting

You must make sure EVERY part of your drivetrain is working before you start tuning on your clutches. The first things to check before you go buy clutch tuning components are:

- Is your motor running like it should? If you cannot pull stock clutching, you have an issue somewhere.
- Do you have a fresh, broken-in belt? Even though your belt may not be shot, it could be worn to the point where you don't get the same performance.
- How are your motor mounts? A motor that moves in the chassis under power will not keep clutch alignment and calibrations go out the window.
- Are your clutches in alignment? Check your alignment with one of our alignment bars.
- Do you have sufficient traction? A studded track is a must for flatlanders if you want consistent results.

Once you have all of these things in line, here are some tips to get your clutching spot on. The first and most important key to getting good clutching is to have good data. This means a recording tachometer or other playback device. In my years in this business I have learned that people cannot watch a tach and give good feedback. It's also dangerous. Max recall on a stock tach is meaningless, also. Once you have good data, these are some of the things that can happen on full throttle pulls from a dead stop: (RPM on the left scale, and MPH on the bottom scale).



- Ideal - The ideal shift curve climbs to your rpm of max horsepower quickly and stays there throughout. This graph assumes 8200 is the ideal RPM.

- Low - If your RPM is low throughout the shift curve, you are over-clutched. You need to drop gram weight in the drive or drop helix angle (initial and final) in the driven. Going up on spring rates in both the drive and driven clutches will also raise operating RPM.

- High - If your RPM is high throughout the shift curve, you are under-clutched. You need to raise gram weight in the drive or raise helix angle (initial and final) in the driven. Going down on spring rates in both the drive and driven clutches will also lower operating RPM.

- Climb - If your shift curve climbs,you have too much helix at the beginning and/or not enough initial driven clutch spring.If you are using adjustable shift weights, you may have too much weight in the heal of the weight (nearest the pin).

- Fall - If your shift curve drops,you have too much helix angle at the finish, too much gram weight in the drive, and/or too much initial driven clutch spring. If you are using adjustable shift weights, you might have too much weight in the tip of the weight (farthest from the pin.)

- Overflash - This occurs when the drive clutch has complete traction on the belt, but the driven clutch does not let it shift soon enough. More initial helix angle and dropping driven spring preload will fix this.

- Slip - This looks like overflash, but the motor is bouncing off the rev limiter at the start. This is caused by the drive clutch not getting full traction on the belt. This can be caused by too much gearing, not enough initial helix angle, too hard of a belt compound, too much drive clutch spring preload, and not enough heal weight in the drive clutch weights.

- Bog - While similar to climb, a bog is more pronounced and can indicate a belt that is shot, a motor problem, or a broken motor mount. A bog that bad generally is not due to clutch tuning.

Tied Driven Clutch

The Tied Driven Clutch is an improvement from the TSS-04 in that the moveable sheave opens axially to the stationary sheave without rotational movement. This translate to no scrubbing motion on the belt face producing less heat and friction. Additionally, all torque is transmitted through the helix, making clutch tuning much more precise. This clutch was developed using the extensive testing and design resources of Venom Products.

- More efficient than non-tied designs
- Backshifts faster than the TSS-04
- Longer belt life
- 16-18° higher helix angles than TSS-04
- Eliminates engine reverse clunk
- Capacity: - 350+ Horsepower
- **Does not include helix or spring**

Tied Clutch Kits

Complete calibrated kits for the 2011-15 Polaris Pro RMK or for the 2012-15 Arctic Cat XF/ F1100 turbo. Upgrade your mountain machine to the unmatched performance of the TEAM® Tied clutch with this complete kit that includes a Tied Driven clutch, spring and helix. Belt life issues are cured with this kit. You will see instant backshift and be able to hold RPM over greater changes in elevation with this kit. This clutch works with the stock drive clutch setup.

Ski-Doo XP Tied Conversion Kit

Take your XP to the next level with the VENOM Tied Conversion Kit. Upgrade your sled to the performance that non-tied clutches cannot deliver. The XP TIED Conversion Kit comes with all the parts you need to install the patented VENOM TIED clutch and the tuning components to make it rip!

Kit includes:

- Hollow Jackshaft
- TIED Secondary Clutch
- Twin Trax Helix
- Drive Spring
- Driven Spring
- Adjustable Pin Kit

Floater Kit for Ski-Doo

Our floater kit allows you to "float" your clutch when used with our jackshaft conversion kit. Under torque, the motor in the XP chassis moves slightly, causing misalignment and greatly increase belt life and efficiency.

SPI Clutch Kits

STRAIGHTLINE PERFORMANCE

Arctic Cat & Polaris Clutch Kits

Complete kits designed to drastically improve acceleration, backshift, and positive gains in MPH. Most kits complete with weights, springs, and helix.

Ski-Doo Clutch Kits

The complete performance clutch kit for your specific machine, clutch kits are designed and tested for a specific model Ski-Doo. Complete easy to install kit that includes all of the clutch parts you will need. Our kits are built based upon extensive field testing in realistic conditions and then tested on our in-house Chassis dyno.

Ski-Doo Clutch Kits w/Adjustable Weight

The complete performance clutch kit for your specific machine. Our kits are built on extensive in-field testing and then tested on our in-house chassis dyno. Complete Kit designed to drastically improve acceleration, back-shift while improving top MPH. This is a complete kit ready to bolt in your machine. For those of you who like to tune this kit includes our fully adjustable clutch weights allowing you to modify the kit for your riding style.

Kit includes:
- Primary spring
- Secondary spring
- Custom Straightline Helix
- Adjustable weights and magnets for clutch weight tuning
- Recommended settings for both Stock & Straightline exhaust applications

Ski-Doo P-Drive Pivot Bolts

Kit includes:
- 3x 13g pivot bolts-
- 3x 15.4g Pivot Bolts
- 1g washers

301277

Arctic Cat & Polaris Adjustable Clutch Weights

Simple yet effective way to change the clutch weight.

- Simply install the magnet and run, quickest changing on the market.
- Yellow Zinc coated for great rust protection.
- 4 locations for adjustability to change the mass of distribution.
- 4 available weight ranges that cover most clutching set-ups.
- Same great quality and strength as the standard Straightline weight.
- No need to bolt or unbolt set screws or bolts.

Make tuning a snap our adjustable weights feature infinite adjustability, using four designated weight slots that hold magnets or a combination of hex bolts and washers. Kit includes adjustable clutch weights, tungsten washers, click in magnets.
Sets of 3.

STRAIGHTLINE PERFORMANCE

P-Drive Adjustable Clutch Weight

This is a complete kit ready to bolt in your machine. For those of you who like to tune this kit includes our fully adjustable clutch weights allowing you to modify clutching for your riding style and conditions. This is the only adjustable P-drive weight on the market that allows you to use your stock p-drive clicker. Tuning components for hundreds of weight combinations, adjustable from 48g-81g.

Kit includes: Adjustable weights (48g), Magnets (1.3 g), Short Pivot bolt (12.8 g), Long Pivot bolt (15.4 g), pivot bolt washers (1.1 g), Long tuning screws (1.8 g), short tuning screws (1.2 g), Tuning screw washers (0.3 g), and a 4mm Allen Wrench.
**** Tungsten tuning washers available for fine tuning (2g/piece)***

Replaces OEM chain used on Arctic Cat, Bombardier (Ski-Doo), John Deere, Kawasaki, Polaris, Sno-Jet and Yamaha.
Count the number of pins in the chain to determine the length needed.
Note: *Check clearance in chain case when upgrading to a heavier chain, and change sprockets to match chain.*

Lake Racer Studs

The "Lake Racer" Power Point stud is designed for the hard-core lake racer. Built off our Power Point shape, this studs unique thin profile, light-weight and durable design has a tapered tip for better penetration. 1" diameter head size for support, and "Track Trapping" design with shoulder to prevent over tightening. 1.375" packaged with .500 Power Tower Support Nut.

**** Not recommended for general trail use.***

Part No.	OEM No.	Description & Quantity
996354	2553-P1	Lake Racer Stud 1.875" Qty 24
996355	2553-P3	Lake Racer Stud 1.875" Qty 96

Power Point Carbide "Push-Through" Studs

Easy installation and great performance. Try a few of these at your next studding party.

- 60° carbide point for superior penetration and durability
- Heat treated for high strength and wear resistance
- Thin penetration profile ensures traction
- Lightweight and durable design
- 5/16"
- Special "tapered" shank design provides the rigidity you need to "hook-up"
- Large 1" diameter head size - won't pull through and very rigid
- Power Point studs included lock-nuts

"SPT" Safety Push-Through Carbide Studs

The SPT carbide stud is designed for the rider who wants to ride safely with the extra confidence that only traction products provide. This stud is a true value that will make it an easy decision to stud-up. The "SPT" features a 5/16" shank, 80° degree carbide. Its large 15/16 headsize is designed to reduce track wear, and thru hardened for its proven strength. Its zinc finish will provide a longer life and resist corrosion. Lock-nut included.

Stud Boy Traction Products

"Power Point + Plus" Studs for Snowmobiles with Single Ply Tracks

This Power Point Carbide Push-Through Stud is designed for the Ski-Doo XP and select Arctic Cat snowmobiles with single Ply Tracks. This stud will offer more support for the trail rider that is running fewer studs than recommended on either the single ply tracks or the 3 ply tracks. Power Point Plus studs are also recommended for multiply tracks when studding in low quantities to help prevent tear outs and track damage.

- It features 60° carbide tip for aggressive penetration, and chamfered head design to reduce vibration and idler wheel wear.
- Use with "Power Plate + Plus" Backer Plates
- Already packed with Power Tower Support Nuts in 1.375" and longer stud
- 5/16" - 24 threads

**** "PS" packaging is intended for use with Pro-Series backers and does not come packaged with nuts.***

Stud Boy Traction Products

Racer Teardrop Backers

These Backer Plates have been trimmed to eliminate weight and offer extra support to the rear of the stud. The domed profile provides greater effective stud height and offered in 7mm hole diameter to cover all stud applications. These Backers are for racing purposes and not recommended for trail use.

Part No.	OEM No.	Description
281993	2060-P2-TRIMMED	Racer Teardrop Backer 7 mm, Qty 48

Aluminum "Power Plate" Single Backers

The "Power Plate" Backer is the industries best backer! This innovative shape provides great stud support and is almost unbendable. We added a radial lobe to a standard 1.125" backer by reducing wear and tear on the track and increasing stud rigidity. By decreasing the weakest flat corner area of the square backer we have reduced unnecessary weight and bending of the corners for a super strong design. Light-weight and durable, use the "Power Plate" aluminum backer and receive the best benefits of both square and round backers in one design!

Aluminum "Power Plate" Double Backers

The #1 choice of many snocross racers and aggressive trail riders, this ISR legal aluminum double backer features light-weight rigid mounting for two (2) 5/16" studs. This durable design is lighter than two (2) aluminum single backers, and allows for extra scratchlines when studding for aggressive performance.

Stud Boy Pro Series Studs & Backers

Super-Lite Pro Series Backer Plates

"STUD BOY" announces their new "SUPER-LITE" Pro Series backer plate line-up. The "SUPER-LITE" Pro Series backer is designed for the rider who is looking for lightweight stud support that offers the lightest weight and best traction available and includes the support nut molded directly into the backer. "SUPER-LITE" Pro Series backers are available in both single and double configurations in black, white and other colors. Their "SUPER-LITE" Pro Series double backer is used for standard tracks using our regular "Power Point" type carbide studs while the Pro Series single can be used with either standard or +Plus style studs on both single and double ply tracks. All Pro Series backers are 5/16"-24 self-tapping thread size. These new backers take traction and stud support to a new level. If you are looking for lightweight super strong stud support you have found it with our "SUPER-LITE" Pro Series backer plates.

Pro Series Backer Installation Tool

The new Pro Series Backer Installation Tool is a must have tool for installing the new Pro Series Backers. This aluminum tool is designed to hold the single Pro Series Backers while installing the studs. The tool allows you to safely apply pressure to the backer and also keep the backer oriented properly for optimum results. While this tool is not designed specifically for the Pro Series Double Backers, it does help when applying pressure to start both studs in the backer.

Part No.	OEM No.	Description

Stud Boy Traction Products

"SuperLite" Backers

The "SuperLite" backer is designed for the rider who is looking for lightweight stud support and vibrant colors. These backers are made from new engineered polymers that are 40% lighter than aluminum while still maintaining excellent strength. " Super-Lite" backers are available in three (3) styles and seven (7) colors - black, white, red, green, orange, yellow and blue. Our "Super-Lite" double backer is used for standard tracks using our regular "Power Point" type carbide studs. The "Super-Lite + Plus" single backer is a larger 1.450" square backer to be used on all tracks (including Single Ply) with any of our 5/16" carbide studs. Our "Super-Lite+Plus" double backer is for the new Single Ply tracks using studs with large heads like our "Power Point + Plus» stud.

"SuperLite Single + Plus" Backer

- SuperLite Single +Plus = 1.450" square (can use with standard or +Plus type studs)

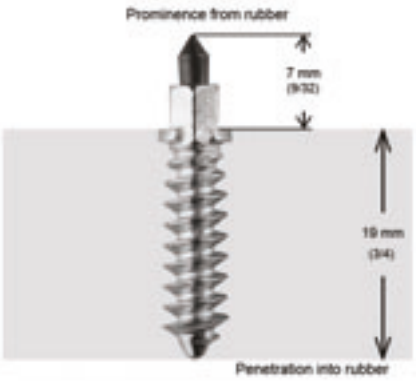
iGrip Studs

iGrip Studs

Great and Simple! Don't slip, get iGrip!

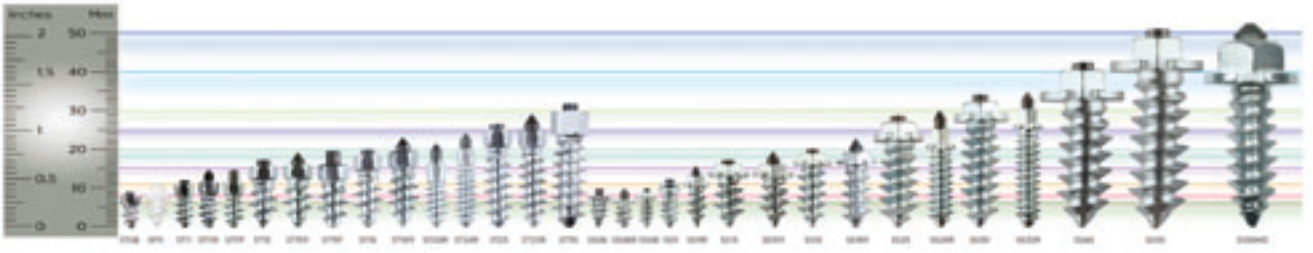
- iGrip screw stud - easy to fit and remove!
- Perfectly suited for off-road and work vehicles!
- Lower fuel consumption!

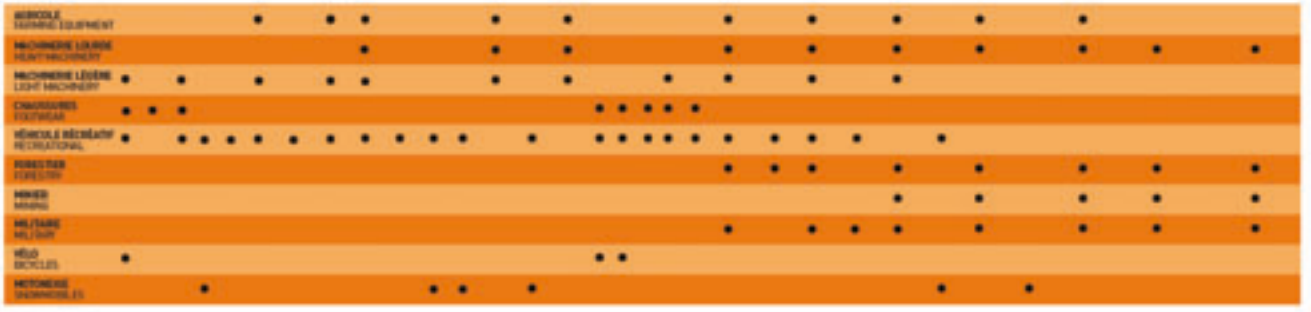
**** Legal Stud on trails in Quebec***



The grey part in the picture shows the snowmobile track stud. The iGrip stud must be inserted as shown in this picture.

The shoulder must be embedded into the tracks' rubber, and the shoulder top must be flush with the rubber.





Nomenclature

- The two first letters identify the stud style, ST / SS :
  ST = Standard thread, stud without shoulder
  SS = Shoulder stud, stud with shoulder
- The two numbers following the letters ST and SS specify the stud's length in mm
- The following numbers specify the quantity, e.g.: SS-30200, 30 mm shoulder stud, 200 studs in the package
- The R means (Racing). Carbide-tipped, e.g.: ST-24200R
- The F means a long flat carbide, e.g.: ST-15200F

No-Slip Sprockets

Patented No Slip Sprockets™ from Wahl Bros. Racing. Designed specifically to prevent ratcheting and forless rotating mass, the No-Slip Sprockets off of four track lugs and track windows at once with one pair. Eliminate those extra involutes with these drive wheels. Be sure to use Anti-Stab wheel kits with these sprockets if rail tip modifications are needed.

Anodized Big Wheel Kits

The installation of a set of big wheels kit increases the diameter of the rear wheels by 1.5'' which makes the track easier to rotate resulting in a gain in HP and offers better performance backwards in the powder snow.

The set includes:

- A desaxed axle
- 2 anodized aluminum wheels
- Hardware required for installation

Tunnel Protector

Also Universal: Does your cleated or studded track leave claw marks in the tunnel or make a clattering noise when acceleration or slowing? Just rivet or bolt on a pair of 46-1/4" X 1-1/8" tunnel wear strips to stop track contact with the body. Its overall length can be modified to adapt to different lengths of tunnels (11 pre-punched holes).

Sold by unit

Ice Scratchers

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

Snow/Ice Scratchers

- Mounts on rear suspension to help throw snow/ice chunks onto hyfax for better cooling on hardpack/ icy trail conditions.
- Helps prevent snowmobile from overheating when riding on hardpack/icy trails.
- Universal application fits all snowmobiles.
- Mounts onto top of suspension rail when not in use.
- Powdercoated Spring Steel wire for maximum durability and performance.
- New design billet aluminum mounting collar bolts on from the inside and offers a clean smooth look.
- Mounting hardware included.
- Replacement springs sold seperately.

Part No.	OEM No.	Description
202146	SS-1	Snow/Ice Scratchers / Pr
202147	SS-1-RL	Snow/Ice Scratchers Replacement Spring Left
202148	SS-1-RR	Snow/Ice Scratchers Replacement Spring Right

Reversible Double Coil Snow/Ice Scratcher

- Mount onto rear suspension and help throw snow and ice chunks onto hyfax for better cooling on hardpack/icy trail conditions; help prevent snowmobile from overheating.
- Made with patented Dura Flex™ Technology

Part No.	OEM No.	Description
202896	SS-8	Steel
202895	SS-7	Titanium
202908	SS-8-R	Replacement Spring, Right Side
202909	SS-8-L	Replacement Spring, Left Side

Carbide Ice Scratchers

For use especially on packed and icy trail conditions, the Ice Scratchers produce and project ice fragments into the track and help lubricate the slides and cool the engine.

- Recommended for 2 inches track lug height or more (**155952**) & less than 2" (**155950**).
- Overall length : 12" (**155950**) or 15" (**155952**)
- Serrated end
- Reversed thread for anti-unscrewing
- Ready to use
- Loctite bottle included
- Carbide tips
- Sold in pair

Part No.	Description
155950	Universal Carbide Ice Scratchers 12"
155952	Universal Carbide Ice Scratchers 15"
155951	Carbide Replacement Tips
155953	Left Thread Bolt

Ice Scratchers

STRAIGHTLINE PERFORMANCE

Performance Ice Scratchers

- The only ice scratcher that uses a Replaceable Carbide tip. Sold in pairs.
- Custom carbide stud tip built by Woody's traction
- Full stainless braided cable for lifetime use
- Designed to be run down at all times but can be flipped up onton rails when not in use
- Compatible with our quick release A-arm mount P/N 185-106

- 12" version designed for tracks under 140" or less than 2.5" lug.

Part No.	OEM No.	Description
284304	185-101	Performance Ice Scratchers 12" w/Carbide Tip

- 16" version available to mount on A-arm or bulkhead to aid in cooling

Part No.	OEM No.	Description
284305	185-102	Performance Ice Scratchers 16" w/Carbide Tip

Replacement Parts

The Rail Saver mount kit allows you to mount any SPI Ice scratchers on the rail during non-use. Mounts come in sets of two, on for each side of the machine.
Replacement Carbide Tips Fit on Ice Scratchers 284304 and 284305.

Extended Length Steel Braided Brake Lines

- 6" Longer than the stock brake line
- Will not swell and feel mushy under high heat braking conditions
- Made with high quality stainless braided steel with protective PTFE inner core
- Outer UV coating for longevity
- All lines come with triple corrosion swivel fittings for maximum durability and easy installation

POWERMADD

Extended Length Brake Lines

Raising the bar just got easier! Riser block are great for getting your bars to right height, but many times raising your bars over 4 inches requires an extended brake line. PowerMadd extended brake lines are made of with extra tight stainless braided lines using a PTFE smooth bore liner which reduces line expansion to almost zero. All lines have a protective coating consisting of a UV protected PVC clear coat.

Throttle Cable Extension Kit™

- Adds 10" of length to the stock throttle cable
- A well-engineered system that extends your throttle cable when installing tall PowerMadd Riser Blocks
- Inline adjuster to fine tune cable tension and slack
- No modification required
- Universal cable end allows the cable extension to be used on all brands

Part No.	OEM No.	Description
200909	43592	Arctic Cat, Polaris, Ski-Doo (See Note # 1)
201207	43596	Arctic Cat 2007-13 - Complete Cable (Ball End)
200901	43595	Yamaha 4-Stroke Models (See Note # 2)
201208	43597	Yamaha 2-Stroke Models - Complete Cable

Note: 1) *Will not work on 2007 and newer Arctic Cat F Series and some M Series due to a change in the stock cable end.*
2) *Does not work on dual cable, 2-stroke models.*

- Made with Polycarbonate 0,070''
- Increased portion to protect hands from the wind on 06-660-02 & 06-660-03
- Fit Most popular model Arctic Cat 2012 à 2017 (except Twin Spar), Yamaha Viper & Sidewinder

Part No.	Description
06-660	Windshield Small Black Opaque A/C & Yamaha
06-660-01	Windshield Medium Black Opaque A/C & Yamaha
06-660-02	Windshield Tall Smoke A/C & Yamaha Sidewinder
06-660-03	Windshield Tall Smoke Yamaha Viper

Kimpex Windshields

Kimpex Windshields

All Kimpex Windshield are made of Optical Grade Polycarbonate which is the same material used as original equipment.

To help you find the appropriate windshield, we have incorporated the heights for all the windshields available. The height of our KIMPEX windshield is measured from the side of the windshield, starting at its base to its highest point on a vertical line.

Cobra Windshields

The Cobra snowmobile shields are offered in different heights and looks to give you a shield that matches your riding style and desired level of wind protection. The height of shields are measured from the point where the shield meets the hood straight up to the tallest point. Cobra shields are made from premium, optical-grade polycarbonate for a brilliant surface and distortion free viewing. Materials of 0.80-Inch are used for a more durable, longer lasting shield.

Mikuni Carburetors

Mikuni Carburetors

These are the most popular high-performance singles carburetors in the sport of motorcycling. Mikuni's are proven as the performance standard for use in single cylinder applications, flat track racing and road racing on both 2-stoke and 4-stoke engines.

Performance features for the VM Series Carburetors include a large selection of bore sizes for increased fuel mixture flow to match engine modifications. And the VM Series offers a wide range of tuning components to allow precise fuel mixture metering in any application, at any throttle setting, under any riding condition.

FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

Carburetor Rebuilt Kits

- Kits include all of the necessary components to repair a carburetor. ATV models with two carburetors include components to repair two carburetors.
- Kit includes all O-rings, gaskets, jets, needle, mixture screw, float bowl screws, float valve needle and seat.
- OEM jet sizes are included in the kit.
- NBR rubber material is used on all O-rings and rubber gaskets NBR has excellent resistance to the ethanol used in today's fuels.
- Applications that use paper float bowl gaskets are upgraded to High Performance Interface Gasket material.
- Components included in the kits are based off of US models and discretion must be used when attempting to install the kit on a non US model.
- Off road use only.

STRAIGHTLINE PERFORMANCE

Fuel Programmer Systems

Allows for adding fuel onlyEnables the user to add fuel at any rpm range.

- Simple plug and play system with no splicing or wiring involved.
- Complete factory looking appearance.
- Enables precise AFR tuning with any bolt on product. (big bores, heads, pipes, etc)
- Kit comes complete with ever necessary component. No need for any additional items.
- Complete kit can be installed and used within 20 minutes.
- Fuel Programmer comes with base mapping to make custom tuning faster and easier.

Fuel Pump

Electrical Fuel Pump

- Compatible with diesel, biodiesel, gasoline, E85, methanol, ethanol, alcohol and other fuels
- Universal design fits most applications
- Pumps 25 gallons per hour between 1.5 and 4 psi
- Self-priming design provides a quiet running volume
- Eliminates vapor lock and flooding
- Fuel filter and installation hardware is included

Part No.	OEM No.	Description

Fuel Filter 3 3/4 in

- Multi purpose filter.
- Fits 7/32" & 1/4" inside diameter fuel lines.

Part No.	Description
907117	Fuel Filter 3 3/4 in

Fuel Filter

Universal Features:
- Multi purpose filter.
- Fits 7/32" & 1/4" inside diameter fuel lines.

Part No.	Description
907116	3-3/4" long

Fuel Filter

Universal Features:
- Sturdy nylon fuel filter.
- Full flow capacity of 11 - 12 gallons per hour.
- Nylon screen traps all dirt particles.

Part No.	Description
07-244	2" long

Inner Ball Check Valves for Fuel Tank

- The ball check valve prevents the flowing of the fuel back into the tank.
- Fits all 7/32'' and 1/4'' fuel line.
- Moto-Ski and Ski-Doo – 414.8657.00 1978-2006

Part No.	Description
07-241	Inner Ball Check Valves for Fuel Tank

Fuel Filter

- Universal inline fuel filter for 1/4'' flange
- Body diameter of 5/8'' and 2 1/8'' overall length
- There is a brass element filter for a better filtration
- Easy to clean with backflushing
- Made for high volume and low pressure inline

Part No.	Description
376385	Inline Fuel Filter (Unit)

BARRICADE

Fuel Lines

Fuel Line Hoses

- Low-permeation fuel hose for carbureted engines in cars, light trucks, off-road vehicles, and small engines and for fuel return lines on fuel injection systems (not for use on the pressure-side of fuel injection systems).
- Carbureted engines (pre-1985) and small engines
- 50 psi working pressure rating (35 psi for ½" ID)
- EEC/EGR, air pump, PCV valve, charcoal canister
- Meets SAE J30R14T1, EPA 40 CFR 1051.110 , and CARB small engine off-road requirements for low permeation
- Approved for use with Gasoline, Ethanol/Gasoline blends (gasohol) such as E10, E15 or E85, Diesel, Biodiesel including soybean methyl ester (SME), rapeseed methyl ester (RME), palm methyl ester (PME), Biodiesel/Diesel blends such as B20, and 100% Methanol
- Temperature: -40°C to 125°C (-40°F to 257°F) Biodiesel/Diesel blends are limited to -40˚C to 100˚C (-40˚F to 212˚F)

Part No.	OEM No.	Description
210346	27304	Line 5/16" X 2
210347	27305	Line 3/8" X 2
210270	27315	Fuel Line 3/8" x 25'
210271	27314	Fuel Line 5/16" x 25'
210272	27313	Fuel Line 1/4" x 25'
210273	27312	Fuel Line 3/16" x 25'

Fuel Injection Lines (MPI)

- Aramid reinforcement spiral braid for superior burst strength
- Fuel injection engines, fuel lines, EEC/EGR, cars and light duty trucks
- Air pump, PCV valve compatible with Gas/Diesel and Ethanol
- Pressure rating: 225 psi (best-in-class)
- Exceeds SAE J30R14T2* as well as low-permeation requirements for CARB
- Approved for use with Gasoline, Ethanol/Gasoline blends (gasohol) such as E10, E15 or E85, Diesel, Biodiesel including soybean methyl ester (SME), rapeseed methyl ester (RME), palm methyl ester (PME), Biodiesel/Diesel blends such as B20, and 100% Methanol
- Temperature: -40°C to 125°C (-40°F to 257°F) continuous, up to 150°C (302°F) intermittent

Part No.	OEM No.	Description
210350	27334	Injection Line MPI 1/4" X 2
210353	27339	Injection Line MPI 1/4" X 25
210354	27340	Injection Line MPI 5/16" X 25
210355	27341	Injection Line MPI 3/8" X 25

KIMPEX

Oil Reservoir Inserts

Kimpex Oil Reservoir Insert

The perfect piece to repair your oil tank.

Applications:
Arctic Cat
- Crossfire, M, and Sno Pro Series.

Ski-Doo
- XP, XM, REV, ZX, CK3 and S2000 Chassis.

Polaris
- Edge, Pro-Ride Chassis

Does not work with oil tanks with opening smaller than 1.75".

Part No.	Description
07-600	Kimpex Oil Reservoir Insert 1.75 in. od

STRAIGHTLINE PERFORMANCE

Oil Reservoir Insert

The oil insert will reshape the top opening back to a perfect sealing surface.

- 1. Repairs the need to replace that leaking oil reservoir.
- 2. No more oily residue on the pull rope, clutches, exhaust, or brakes.
- 3. Wide top lip for large sealing surface.
- 4. Tapered bore for added strength.
- 5. Complete with rubber O-ring for added sealing.
- 6. Makes removing and installing oil cap easier.
- 7. Will fit any oil reservoir opening with a 1.75" opening.

Applications:
Ski-Doo
- XP/XM
- REV
- ZX, CK, F et S

Arctic Cat
- HCR
- Crossfire
- M-Series
- Sno Pro

Polaris
- any chassis with a 1.75 inch oil reservoir opening
- with reservoir opening smaller than 1.75 inch.

Will not fit these OEM oil cap/reservoirs:
- **Arctic Cat** Procross
- **Arctic Cat** Firecat
- **Arctic Cat** Twin Spar
- **Arctic Cat** Z, ZL, ZR

Part No.	Description
284144	Oil Reservoir Insert

076585	2-3/4'' I.D., VM 40-44, straight, 4'' X 6'' karting

Air Filters & Snowchargers

The prefilter answer to all that snow that wants to pack down into the pleats of your snowmobile air filter. Snowchargers are silicone treated polyester wraps that repel snow and water. Melting snow just breads off instead of soaking the filters, Snowchargers also deflect all the grass, twigs, rocks and dust you encounter when grass tracks racing or crossing snowless trails. Snowchargers offer minimum restrictio yet optimum airflow increased engine power. Snowchargers are easy to clean and return to service.

Known as "snowcharger" air filter. These will provide you with unrestricted airflow which will give you more power. Not recommended for deep snow conditions.

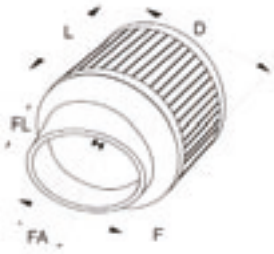
Air Filters for Snowmobiles



XSTREAM® Universal Air Filters - Designed for serious snowmobiler racers!

Available is K&N's patented X-stream top for even more increased air flow. When racing in the snow or grass, you need all the protection and airflow possible. Mikuni carburetors VM 36-38 I.D. flange and VM 40-44 use filters with a 2-3/4" I.D. flange. Keihin carburetors may be used 2-7/16" to 3" I.D. flange.

Air Filter Yamaha

- Designed to provide increased horsepower and torque
- Pleated media provides a large filtration area offering long service intervals
- Multiple layers of woven cotton gauze media offers excellent filtration
- Application specific base seal and sealing bead
- Washable & reusable, pre-oiled and ready to ride!

K&N Air Filter for Snowmobiles

THESE PRODUCTS ARE ONLY AVAILABLE TO REGISTERED K&N RESELLERS

K&N Universal Air Filters

F = INSIDE FLANGE DIAMETER
This is the most critical dimension and should be very close to the diameter of the application inlet flange. The K & N filter will stretch about 1/8'' for those odd sizes.

FL = FLANGE LENGTH AND ANGLE
If no length is listed it will approximate 5/8'' long. The angle is listed in degrees and helps to position the filter when space is a problem.

D = DIAMETER
This is the overall diameter of the filter. Always use the largest diameter practicable to insure maximum filtration.

L = LENGTH
This dimension does not include the flange length - only the body. Always use the longest filter practicable for maximum filtration.

O = OFFSET
Sometimes the flange is offset to one edge of the filter.

(1): Filter has molded-in velocity stack

Foam Filter Oil & Carburetor Cleaner

Carburetor Cleaner

- Removes gums and varnishes quickly and throughly
- Powerful solvents ensure down to metal cleanliness
- Restores proper engine performance and fuel economy
- Use on metal carburetors only (Not suitable for plastics)

Part No.	OEM No.	Description
713312	301	Carburetor Cleaner - 312 g. Aerosol

Carburetor & Choke Cleaner

- Cleans automatic chokes & carburetors, heat risers and PCV valves
- Oxygen sensor safe
- Effectively cleans dirt, gum and varnish from carburetors, fuel injection throttle bodies, automatic chokes, PCV valves and throttle linkage

Part No.	OEM No.	Description
730232	76064	312 g. – 12 units per case

Foam Filter Oil

Provides superior filtering for all foam type air cleaners.
Traps all dust, dirt and sand, repels water, and will not wash off.

VForce3 Reed Valves

What is the VForce3 reed valve system?

The VForce3 is a reed valve system that completely replaces your stock reed valve assembly. The simple premise of the VForce3 reed valve system is to increase engine power and throttle response by increasing the efficiency over a conventional reed valve design.

What can I expect after installing the VForce3 reed valve system?

Dyno testing shows an immediate horsepower gain of anywhere from 5-10% through the majority of the powerband. The VForce3 also greatly increases throttle response and acceleration, while also broadening the peak power.

What is involved with installing the VForce3 reed valve system?

Simply remove the stock reed cage assembly and replace with the VForce3 reed valve system. The VForce3 is truly a simple bolt-in. If you're able to check your reeds for wear (which you really should be doing at least annually) then you have all the skills necessary to install a VForce3 reed valve system.

STEALTH by KIMPEX

DRIVE WITHOUT DARTING OR LEAVING A TRACE

Kimpex breaks new ground once again in the world of snowmobiling. This totally new ski glides in the snow, not on the snow, without leaving a trace. Curved and with no central fin, its special ski base removes all trace of the blade to keep from inconveniencing the snowmobile following behind. Kimpex has brilliantly created this unique characteristic that lets you follow a snowmobile equipped with the same skis, and not constantly fall into its tracks.

STEALTH by KIMPEX

Stealth Complete Kits

C&A Pro Skis & Accessories

2 Mount Kit

Ski Mounts & Dampeners

NOTE: This mount kit comes with all the necessary hardware and dampeners for one pair of skis. Mount kit will fit C&A Pro Skis only.

FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

Cornering Plate Kit

18" long x 4" tall cornering kit includes all mounting hardware. 3/4" bend on top 1" of plate.

C&A Pro Cornering Kits are designed for snocross racing and snowmobiling in deep snow. Cornering Kits deflect snow, allowing you to make tighter corners and stay on the inside line without additional drag or resistance with your straight line tracking. C&A's Cornering Kits are the largest allowed by ISR Rules. You can slide the kit as far forward or backward as you want on the ski to allow displacement and ski pressure at exactly the spot you need for better cornering. The Cornering Kit will work with any C&A Pro snowmobile ski. Spacers can be used with wider skis.

ROUSKI EVO

HOW ABOUT AN
EVOLVED VERSION OF THE ROUSKI?

Next winter, Rouski will implement a new design to become the Kimpex Rouski EVO. A new design concept to improve your off-snow riding experience!

Remaining as efficient as ever to protect your runners and facilitate off-trail riding, the **Rouski EVO** features an easier-to-engage system, which is compact, lockable, and better integrated.

Unique on the market, the retractable wheel mechanism also stands out with its two-part design: the **Rouski Evo** mechanism and an adapter for different ski models. The same **Rouski EVO** can thus be installed on different machines by only changing the adapters.

WHY STRAIN YOURSELF?

THE ROUSKI EVO WORKS FOR YOU!

KIMPEX ROUSKI

The foot pressure on the pedal activates the two-part mechanism that gradually multiplies the output force to lift the ski and lock the wheel in place.

UPDATED DESIGN FOR UNIQUE BENEFITS

PATENTED PENDING

EASIER TO ENGAGE

- **Engage the wheels with foot pressure** alone on most surfaces.
- **Multiply the push force by 8** thanks to the double pivot mechanism.

PATENTED PENDING

THE FIRST FULLY LOCKABLE SYSTEM

- **Cross obstacles and back up** without fear of wheel disengagement.
- **Lock the wheels in the up position** for long rides.

PATENTED PENDING

UNIQUE TWO-PART DESIGN:

the universal Rouski + ski adapter

- **Remove the Rouski EVO** and keep only the ski adapter.
- **Use of the same Rouski EVO with different skis** just by changing the adapter.

Retractable Wheel Systems

KIMPEX ROUSKI

Rouski Gen3

Have a look on the main benefits of the Rouski retractable wheels:

- Protects garage and driveway pavement
- Makes the travel to the restaurant or the gas station easier
- Makes it easier to drive the snowmobile back in the trailer
- Allow you to take teh ferry
- Safe riding on bridges and roads
- Make driving easier, especially while cornering or driving on hard surfaces
- Minimizes wear on guide rails and skis
- Works as well when you drive forward than when you drive in reverse
- No modification on the snowmobile's original parts
-

A well thought out mechanism...

- Rouski automatically retracts on snow-covered trail
- In just a few secondes, you can engage the Rouski mechanism and keep on riding

Carbide Runners

SnowTracker Replacement Wearbars

These runners are special due to their revolutionary design. Treated thermically with a hardness balanced in order to offer an equal wear of your runner. The snowmobile encounters almost no resistance because the runners are very thin (1/4 of thickness). The carbide is 6 inches and 1/16" wide. These runners were conceived to regulate the problem that all snowmobile riders have all the other runners on the market. They offer 50% more adherence in the curves and this during all the life of the carbide. The auto-sharpening system is vey simple; the runner is sharpened simply by the passage of the snowmobile on the sides of gravel roads or paved roads.

***Attention: These runners are for the original ski (OEM).Not compatible with SnowTracker steering stabilizer**

Semi-Aggressive or Aggressive Runner Complete Kits

Do you want to improve control? Here is how to eliminate darting, zigagging on icy & snow covered trails. Install the snowtracker Semi-Aggressive kit, with self-sharpening 6 inches carbide runners, with the corrector and rediscover the confidence in any conditions, in trails, icy and snow-covered, espacially in grooves that were left by other snowmobiles. You will have no more darting or zigzagging. Ride like the pros.

Carbide Runners

Enduro Bars

The "Enduro Bar" is our newest runner designed to be big and bold on the trail. Offering a rectangular shape .437" wide x .650" deep providing great handling and durability with 60° degree cutting carbide. This runner is easy on the arms while still maintaining very aggressive turning with tight radius corners being no problem. E-coated in a corrosion resistant black finish.

Available in 4.5", 6", 7.5" and 9" carbide lengths for current OEM and popular aftermarket skis.

Shaper Bars

Shaper Bar will take wearbar design and performance to a new level. This new bar offers a unique shape that provides much better turning than conventional bars and offers a 25% weight savings too. The concave side profile on the Shaper bar grabs and holds snow rather than allowing snow to slip by like other wearbars. While the shape of this bar improves the turning radius of your sled in the snow, the large 60 degree carbide provides great control and wear on hard surfaces. You need to get your hands on these wearbars if you want the latest and greatest in traction and control for the front of your sled.

- Available in 4.5", 6" and 9"

Sold in Pair.

Deuce Bars

The "Deuce" Bar takes dual type wearbars to a new level. Utilizing the design benefit of the original "Shaper" Bars' concave side, this new dual runner provides better turning than other dual runners and still provides the benefit of "no darting" while cruising down your favorite trail. Available in 4.5", 6" and 9" of 60 degree cutting carbide to fit popular current snowmobiles

- One piece design offers lighter weight
- Still turns like a performance runner
- No DARTING - makes it's own groove
- Best performing dual runner available
- Won't clog with snow, ice or rocks
- Won't snag obstacles like other dual runners
- Long life - very durable
- Eliminates dual runner type drag – no "top end" loss
- Available in 4.5", 6" and 9"

Sold in quantity of 1

Handlebar Risers

Angled Handlebar Risers

- Precision angle moves handlebars straight up from center of steering post.
- Offers increased comfort and feel for aggressive mountain riding or trail riding.
- Fits flat style steering posts only.
- Custom inserts included allow risers to work on stock 7/8" handlebars and oversize 1 1/8" handlebars.
- 6061 T-6 aluminum construction.
- Universal type design fits multiple applications.
- Simple bolt on design installs in minutes.
- Most snowmobiles will allow 2" or 3" of rise without extending cables or wiring.
- Available in Silver or Black in 2", 3", and 4" heights.

30 º Fits:
- All Polaris (Except 09-2015')
- Ski-Doo Rev and ZX Chassis
- All Arctic Cat (Except M-Series, Pro Cross, and Pro Climb Chassis), Yamaha MTN Max, SX, SRX, Viper 03-18

15 º Fits:
- ALL Arctic Cat M-Series and Crossfire Chassis without telescoping post,
- 2011-2015 Polaris Pro Ride Chassis with flat plate style steering posts or with Pro Taper Handlebars
- 2009 thru 2013 IQ Polaris with flat plate style steering posts or with Pro Taper Handlebars
- 2016-18 Polaris Axys RMK

Pivoting Handlebar Risers

- Dual pivoting adjustability allows you to position handlebars where you want them.
- Available in 2", 3", 4", 5", 6", 7", 8", 9", and 10" heights.
- Easy one bolt installation.
- Revolutionary mounting design resists riser slipping during hard hits or aggressive riding.
- Custom inserts included allow risers to work on stock 7/8" handlebars and oversize 1 1/8" handlebars.
- 6061 T-6 Aircraft aluminum resists bending or twisting.
- For use with pivot style steering posts or steering posts with adapter tubes.
- Rise is measured from center to center.
- Anodized Black color finish.
- Sold per pair.

Note: Double check length of cables and brake lines for proper fit.
Extended length cables or brake lines may be required for proper operation.

Pivot Adapter Kit™

Pivot Style Riser Block Conversion Kit

- Allows the handlebar and rider to move forward, optimizing the center of gravity of your snowmobile for better handling and control (like the Ski-Doo MXZ-REV chassis concept)
- Handlebars can be pivoted forward or back from original stock position
- Pivot Adapter raises bars an additional 1.25"
- Choose a PowerMadd Riser Block height of 2", 4", 6", or 8", or an OEM Pivot Style Riser Block
- Machined from 6061-T6 aluminum for maximum strength
- Most snowmobiles accept the Pivot Adapter and a 2" Riser Block without modification to cables or wiring
- Order an Arctic Cat model of the PowerMadd Pivot style Riser Block to fit on the Yamaha Pivot Adapter

Part No.	OEM No.	Description
200959	45580	Pivot Adapter for Arctic Cat

PowerRiser 325 Pivoting Riser

- One piece solid aluminum design for superior strength
- 3.25" wide fits 7/8" bar clamps on all snowmobiles and Bombardier and Polaris ATVs
- Provides dual pivot points allowing for bars to be positioned front to back and rotated up or down. 2" rise will work on most snowmobiles with no cable modification, ATVs should check available cable slack.
- Two models – for 7/8" bar clamp using 7/8" bars, and for 7/8" bar clamp using oversize 1 1/8" bars.
- For 3" rise use PM15400

Part No.	OEM No.	Description
201138	45421	2"x 3.25" for 7/8" to 1-1/8" bars
201885	45419	2"x 3.25" for 7/8" to 7/8" bars

Pivoting Risers

POWERMADD

PowerRiser 475 Pivoting Riser

- One piece solid aluminum design for superior strength
- 4.75" wide fits 7/8" bar clamps on all ATVs and motorcycles
- Provides dual pivot points allowing for bars to be positioned front to back and rotated up or down.
- Check available cable slack to make sure existing cables will work with the riser.
- Two heights available – 2" and 3"
- Two models – for 7/8" bar clamp using 7/8" bars, and for 7/8" bar clamp using oversize 1 1/8" bars.

Part No.	OEM No.	Description

Sentinel Handguards

PowerMadd is excited to introduce his latest handguard offering! The Sentinel Handguard is designed to be the most stylish, durable and functional handguard to date. The Sentinel guard is larger compared to the Star Series which in turn gives you more protection. The mounting brackets are 6061 aluminum, while the guard itself is made of two different types of plastic: a stiff two piece spine for durability and a softer colored body for flexibility.

The Sentinel protects your hands from flying debris, rocks, bushes, branches, and mud. Plus it keeps your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through.

Handguard and mounting kit are sold separately.

Sentinel LED Turn Signal Kit

Maximize your visibility to approaching vehicules by adding Powermadd's super bright Sentinel LED Turn Signal Light Kit. The light includes a white LED running light which turns off when the amber turn signals are activated. The turn signals operate in conjunction with your original equipment turn signals. Simply snap out your Sentinel handguard vent covers and snap in the LED turn signal light kit. Easy four wire installation (power, ground, left turn signal, right turn signal).

Part No.	OEM No.	Description
202746	34491	Sentinel LED Turn Signal Kit

Sentinel Mirror Kit

The kit includes two mirrors and all hardware needed to make the mirror fixed or folding. The Mirrors consist of a polypro plastic base and a 2.75" mirror which gives you safety and piece of mind. The mirror has been designed specifically for the Sentinel Handguards and follows the lines and shape of the guard for a clean look and they can fold in when not in use or if you use a cover. Our Sentinel Mirrors attach directly to your Sentinel Handguards with a few simple steps. The mirror kit will work with the Armor, Hand Wrap, Flare and Gauntlet. Note: Armor and Hand Wrap work with fixed mount only.

Part No.	OEM No.	Description
201859	34455	Sentinel Mirror Kit

Sentinel Armor

The Sentinel Armor permanently attaches to the PowerMadd Sentinel handguards adding complete 360 degree protection. Utilizing the Sentinels popular style the Sentinel Armor looks good while doubling the amount of protection! The Sentinel Armor is constructed of light weight closed cell molded AEPE foam, which is both waterproof and extremely durable.

Part No.	OEM No.	Description

Star Series Handguards

The Ultimate in Hand Protection

The ultimate in hand protection, the Star Series Handguard System features great looks, functionality and versatility. It's the only all-season handguard - vented for summer, snap in the vent cover for spring and fall, and snap on the optional extensions for winter. The hand wrap attachment converts that guard to full wraparound protection for woods or SuperMoto. With a universal mount kit, multiple factory-matched colors and a one year warranty - it's no wonder they're the hottest thing in hand protection. Handguards & mounting kits are sold separately.

201937	34290	LED Light Handguard Star Series Kit

Turn Signal Kit - Star Series Handguards

Introducing our newest accessory for the Star Series line of handguards. Maximize your visibility to approaching vehicles by adding PowerMadd's high powered Star Series LED Turn Signal Light Kit. Designed specifically for all Harley Davidson motorcycles. Super bright amber and white LED light. The white LED light is a running light and turns off when the turn signals are actived for better visibility. The turn signals operate in conjunction with your OE turn signals. Simply snap out your vent covers and snap in the LED turn signal light kit.

- Easy four wire installation (power, ground, left turn signal, right turn signal).
- For an even easier installation, use one of our Plug-in Play wire harnesses! The 34292 and 34293 wire harnesses will eliminate the stock turn signals.
- Requires: Star Series Handguards and Mount Kit

Note: *These lights are COB (Circuit on board) LED Light strips and will require the use of a load equalizer if model is Non can bus. Models with Can bus wiring do not require the use of a load equalizer.*

Handguards & Gauntlet

Trail Star Handguards

- Non-vent, lower cost option to Star Series handguards
- Works with Star Series mount kits
- Works with Star Series options – mirrors, hand wrap, and gauntlets

Part No.	OEM No.	Description
201108	34100	Trail Star Handguard, Black
201112	34104	Trail Star Handguard, White

201939

202006

Fuzion Handguards

FUZION guard features the ultimate in hand protection with a unique design and flexible yet durable material. The expanded coverage area sweeps back toward your hand significantly increasing coverage making it perfect for cold, muddy or wet conditions. The FUZION features a unique two position mount and is constructed of molded light-weight closed-cell AEPE foam, which is crushproof, water proof and extremely durable. The FUZION will work great for backcountry and mountain riding or any other condition where roll-overs are used to get your sled un-stuck and bouncing off trees is common occurance.

Part No.	OEM No.	Description
201939	34500	Fuzion Handguard - Black
202006	34505	Fuzion Handguard - Black/Black

Handguard Gauntlet X2 (pair)

The Gauntlet X2 attaches easily to any handguard giving you added warmth and protection from roost, water, snow and mud. The Gauntlet X2 uses your existing handguards for support. The updated X2 features a new look, upgraded attachment mechanism and an improved stay-open design. The stay open design allows the rider to easily see the controls, return a gloved hand to the grips, ride with thinner gloves and gives you better feel and control. Engineered and constructed with a rigid yet flexible bone material for a positive stay open design.

NOTE: *Works with the Sentinel, Star Series, Trail Star and most other handguards.*

Part No.	OEM No.	Description
201948	34458	Handguard Gauntlet X2 (Pair)

BITEHARDER
TUNING YOUR POWERSPORTS PASSION

Suspension Rings & Ski Shock Absorbers

Polytune Suspension Rings

- Polytune™ Rings provide a simple approach to tuning your stock suspension for a greater level of performance; Flatter handling for faster cornering speeds and control
- Improved damping for better noise, vibration and harness resulting in less rider fatigue.
- Keeps your skis firmly planted to the ground for better traction and rough trail compliance.
- Proprietary polyurethane material (Industries best) maintains performance characteristics from -45 Degrees to +200 Degrees Fahrenheit.Polytune™ Rings come in two different tuning densities to match your individual riding style/preference; Medium/Hard

Product identification : Tuning density can be found on the PolyTune Rings parting line via raised bumps/dimples, and by cross-referencing the information below;

Two bumps - Tuning density: Medium
Riding Style Description: You ride at moderate to aggressive speeds depending on conditions but want more performance particularly in the corners and bumps.

Three bumps - Tuning density: Hard
Riding Style Description: You are an aggressive rider who demands fast corners and enjoys the bumps.

PolyTune Ring Size (height) is marked on the outside diameter of the ring using the following codes;
"SA" for coil spacing of 0.70 to 0.89 inches (18 to 23 mm)
"SD" for coil spacing of 1.30 to 1.50 inches (33 to 38 mm)

Part No.	OEM No.	Description	Size
070856	PSTRS-M-SA-B	Medium	SA
070887	PSTRS-H-SD-B	Hard	SD

- 2 washers (**7555721**)

Part No.	Description
08-3304	Trailing arm replacement bushing kit - 10 pieces

08-3304

Bushing Kit for Polaris

Models XL 500/600/700 1997-98
22 pcs
Kit contains:
- 2 metal bushings & 2 plastic bushings (replacement for **5010158**)
- 2 bolts and nuts (**7515462**)
- 4 metal bushings (**5010127**)
- 8 plastic bushings (**TBA**)
- 2 plastic bushings (**TBA**)

Part No.	Description
08-3305	Bushing Kit for Polaris - 22 pieces

08-3305

Bushing Kit for Polaris Radius Rod

Models Indy RXL/XLT 1997-98
Kit countains:
- 4 plastic bushings (**5010127**)
- 8 plastic bushings (**TBA**)

Part No.	Description
08-3307	Bushing Kit for Polaris Radius Rod - 12 pieces

08-3307

Yamaha (With TSS Front Suspension)

Kit contains:
- 12 Spacer washers (**08-410-30**),
- 4 Collars (**08-410-31**),
- 12 Bushings (**08-410-32**),
- 4 Bushings,
- 2 Collars (**08-410-34**),
- 2 Collars (**08-410-35**).

Part No.	Description
08-4300	Bushing Kit for Yamaha TSS Front Suspension

Bushing Kits

08-4301

Bushing Kit for RX & RS

Kit contains:
- 4 Bushings (**90381-16N51-00**)
- 8 Bushings (**90381-15N50-00**)
- 4 Bushings (**90381-15001-00**)
- 4 Bushings (**90381-16001-00**)
- 4 Bushings (**90381-25115-00**).

Part No.	Description
08-4301	Bushing Kit for Yamaha RX & RS Front Suspension

08-4305

Front Ski Bushing Kit for Yamaha

18 x16 x19
Models All Yamaha 1997 & up
Kit contains:
4 metal bushings (90384-16251-00)

Part No.	Description
08-4305	Front Ski Bushing for Yamaha - 4 pieces

08-4306

Bushing Kit for Yamaha

28 pcs
Models RX-1, Warrior 2004-05/RS Vector, Rage 2005-10/Apex, Attak 2006-10

Part No.	Description
08-4306	Front End Bushing Kit Yamaha

08-4307

Yamaha Nytro

For 2009-12 Yamaha Nytro
Kit contains:
12 Oil lite bushings (90381-18N51-00)

Part No.	Description
08-4307	Bushing Kit for Yamaha Nytro

KIMPEX

KIMPEX PISTONS.
SINGLE OR DUAL RING.

HIGH PERFORMANCE AT A COMPETITIVE PRICE.

HIGH RELIABILITY

High-performance long-lasting pistons

Optimal heat transfer from the combustion chamber to the cylinder wall

Teflon coating for less friction during the break-in period

Piston, ring(s), retaining pin and retaining clips, manufactured to oem specifications and dimensions

KIMPEX

KIMPEX.COM

Kimpex Piston Kits

High Performance Pistons

High performance, long life. Die-cast models available. Engineered to provide the best possible path for combustion chamber heat transfer to cylinder walls PTFE coating.

Piston kit includes: Piston, Rings, Pin and Circlips.

- All pistons, rings, pins and circlips are manufactured to O.E.M. specifications.
- All individual components will interchange with original parts. **Important Note: Chrome plated rings cannot be used in chrome plated or electrofusion liners.**

Pistons and Rings Installation Guide

The following guide is intented for experienced mechanics and should not be the only reference for installing a new piston.

Preliminary Work

- If the old piston has failed, determine the cause and remedy the problem before replacing.
- Air leaks and/or a lean fuel mixture are the two biggest causes of burned pistons.
- In cases where any part of the old piston is broken or burned through, the crankcase should be disassembled and thoroughly flushed of any debris.

Cylinder Preparation - Cast Iron Liners

- Measure cylinder for taper and out-of-roundness. Any measured difference of more than .003" (smallest cylinder diameter to largest) would indicate re-boring is necessary.
- Hone good condition cylinder with #220 or 300 grit stones to de-glaze. A 60°cross-hatch pattern is the recommended finish to insure proper ring sealing.

Cylinder Preparation- Chrome, Nikasil or Electrofusion Liners

- Measure cylinder for taper and out-of-roundness. These models cannot be re-bored; if a measured difference of more than .003" exists between smallest and largest cylinder diameter, the cylinder must be replaced or sleeved with a cast iron liner. Hone good condition cylinder with #500 grit stones.

Port Opening Preparation

- To prevent ring breakage, all horizontal port edges must be chamfered until a minimum 3/64" radius is produced. The best method is to pull strips of emery cloth through the ports or use a round file.

Piston and Ring Installation

- Remember never install chrome rings in chrome plated, nikasil or electrofusion cylinders.
- Prior to installation, fit each ring into the cylinder bore and measure the end gap to eliminate the chance of ring butting. Acceptable gap range is .010 to .025. If gap is inadequate, carefully file to the recommended specs. See "Piston Clearance Guide". Clean and lubricate all moving parts with 10W30 oil.
- Install pistons with the arrow pointing to the exhaust side of the engine (except for few models Polaris where the arrow points toward the magneto side).
- Install circlips carefully without forcing, bending or turning them. Be sure they seat properly in the grooves and position the openings down.
- Install rings onto matching pistons. Lubricate and check to be sure the end gaps can be completely closed around the locating pins.
- Install new base gaskets, compress rings and carefully slide the cylinders down into position. Before installing the cylinder heads, rotate the crankshaft by hand to make sure pistons and rings move freely into cylinder.

Break-in Procedure

- Overhauled snowmobile engines require a short break-in period. For oil-injected machines, add a pint of 50:1 two-cycle engine oil to the first 5 gallons, running the pre-mix in conjunction with the oil injection system. For pre-mix systems, use 20:1 oil ratio with the first 5 gallons of mix.
- For good engine break-in, set carburetor to rich mixture, avoid sustained high or low RPM operation, vary the driving speed and briefly accelerate at full throttle.

Piston Clearance

- Refer to shop manual or dealer for clearance references.

VISIT ORDER.KIMPEX.COM

Wiseco Piston Kits

Pistons are precision machined on the latest, state of the art CNC equipment. The same low-expansion, low-friction piston alloy is used as is used for all major Japanese engine manufacturers. Piston Kits are a first class solution to replace the original piston in your Motorcycle, Scooter, Moped, ATV, Personal Watercraft, etc.

Piston for sleeved cylinders are available in standard size and a wide range of oversizes. The availability of oversizes up to 2mm significantly helps to increase the lifespan of a cylinder by offering more re-boring possibilities. Pistons for plated cylinders come in standard size, as well as in A, B, C, D+ oversizes. Take advantage of the additional oversizes to extend the lifespan of plated cylinders. All Piston Kits are supplied complete with Piston Rings, Wrist Pin and Circlips.

- 2 and 4 stroke kits sold complete with: pistons, rings, piston pins, clips and top end gasket kits.
- Individual pistons sold complete with : rings, piston pins and retainer clips.

Wiseco Piston Installation Guide

Cylinder Preparation - Cast Iron Liners

Have a reputable experienced company bore or hone your cylinder. Be sure the piston is measured 90° from the pin near the shirt (bottom) of the piston (the exact point of measurement where piston is the largest). **Also follow recommended clearances included in the installation instructions.** A cross hatch pattern is recommended with a horning stone of 280 to 400 grit.

Cylinder Preparation - Chrome, Electrofusion, Nikasil

These are all plated cylinders and can not be re-bored. Re-sleeving is required. When replacing or re-ringing the piston in a standard bore stock cylinder, de-glazing is recommended using a ball type flex hone.

Head Gasket Installation

After piston installation, put on a new head gasket and torque to factory specs. Start engine, allow ample warm up time and shut down and let engine cool completely. Retorque cylinder head to factory specs because gasket will compress under initial heat. This extra step eliminates any possibility of head gasket leakage which can cause severe engine domage.

Circlips

Wiseco Circlip must be used when installing Wiseco Pistons.Refer to the circlip instruction sheet enclosed with the piston. **The use or re-use of any other circlip can cause severe engine damage.**

Piston Ring Installation

Prior to installing piston rings, fit each ring into cylinder to insure proper end gap. See ring instruction sheet. Rings should be lubricated with a light oil prior to installation to avoid scratching the cylinder wall. **Importante Notice: Chrome plated rings can not be used in chrome plated cylinder, but can be used in Electrofusion or Nikasil.**

Wrist Pin Installation and Removal

Use hand press fit to install a lubricated pin into a piston.
Never force to insert or remove pin (i.e. beating pin with a hammer). You may cause damage to piston skirt or rod. To avoid damage, heat piston slightly.

Markings on Top a Wiseco Piston

The top of a Wiseco piston will be stamped with (a) Piston part number; (b) Ring Type, (c) Oversize in mm, and (d) an arrow pointing to the exhaust side of the engine.

Wiseco Rings

All Wiseco rings ca be used in cast iron, nickel ceramic platings (Nikasil), boron composite and Electrofusion bores. CAUTION : Unless otherwise noted, Wiseco rings can NOT be used in chrome plated bores. Engine damage will occur. *CSM, CDM, KAM et KDM rings are designed to be used in chrome bores.

Type	Thickness		Bore Range	Description
2-Stroke Rings				
CS	1 mm (.039")		39 - 74 mm (1.535 - 2.913")	Alloy steel, ferrox coated, chrome faced, internally notched
CST	1 mm (.039")		54 mm (2.126")	Alloy steel, ferrox coated, chrome faced, internally notched
CD	1 mm (.039")	1 mm (.039")	39 -74 mm (1.535 - 2.913")	Alloy steel, ferrox coated, chrome faced, internally notched
CDW	1 mm (.039")	1 mm (.039")	73.4 mm (2.890")	Alloy steel, ferrox coated, chrome faced, internally notched (for 2.04mm knock pin)
*CSM	1 mm (.039")		39 -73 mm (1.535 - 2.874") (for use in - Chrome Bore -s)	Nodular iron, phosphate coated, internally notched
*CDM	1 mm (.039")	1 mm (.039")	39 -73 mm (1.535 - 2.874") (for use in - Chrome Bore -s)	Nodular iron, phosphate coated, internally notched
TC	1.2 mm (.047")		74.25 - 91 mm (2.923 - 3.583")	Alloy steel, ferrox coated, chrome faced, internally notched
TD	1.2 mm (.047")	1.2 mm (.047")	74.25 - 91 mm (2.923 - 3.583")	Alloy steel, ferrox coated, chrome faced, internally notched
TDW	1.2 mm (.047")	1.2 mm (.047")	74.8 - 81 mm (2.945 - 3.189") (for 2.04 mm knock pin)	Alloy steel, ferrox coated, chrome faced, internally notched
LT	2 mm (.079")		64.5 - 80 mm (2.539 - 3.150") half-keystone, Dykes «L»	Nodular iron, phosphate coated, chrome faced, internally notched
LK	2 mm (.079")		64.5 - 80 mm (2.539 - 3.150")	LK ring package contains (1) LT ring, and (1) flat ring. The flat ring will be a CS style for bore sizes up to 74mm; TC style for 74.25mm bores and larger
LF	2 mm (.079")	2 mm (.079")	81 - 84 mm (3.189 - 3.307")	The LF pasckage contains (1) Nodular iron, phosphate coated, chrome faced, internally notched, half-keystone, Dykes "L" top ring, and (1) cast iron, phosphate coated, internally notched second ring
KA	1.5 mm (.059")	1.5 mm (.059")	55.57 - 98 mm (2.188 - 3.858")	Alloy steel, ferrox coated, chrome faced, side notched, half-keystone
KD	1.5 mm (.059")	1.5 mm (.059")	55.57 - 98 mm (2.188 - 3.858")	Alloy steel, ferrox coated, chrome faced, side notched, half-keystone
*KDM	1.5 mm (.059")	1.5 mm (.059")	80.5 - 91 mm (3.169 - 3.584") (for use in - Chrome Bore -s)	Nodular iron, phosphate coated, side notched, half-keystone
KB	1.2 mm (.047")	1.2 mm (.047")	82 - 85.25 mm (3.228 - 3.356")	Alloy steel, ferrox coated, chrome faced, side notched, half-keystone

Type	Bore Range	Top Ring	Second Ring	Oil Ring
4-Stroke Rings				
CS	59 - 74.5 mm (2.323 - 2.933")	0.8mm (.031') Allow steel, ferrox coated, chrome face	0.8mm (.031") Cast iron, phosphate coated, taper faced	1.5mm (.059") 3 pieces oil assembly; Stainless steel flex-vent spacer, chromefaced rails

ProX Cast Piston Kits

- High quality cast piston made with dedicated tooling and molding
- Made from Hypereutectic alloy for extra strength and reduced expansion
- Special dual ring set up for improved durability and resistance to wear
- Full MOS2 skirt coating for improved breaking in and resistance to scuffing
- Anodized piston dome for increased protection against excessive heat
- Usage of high quality rings such as Riken for optimum heat transfer and sealing
- Packed in a box containing piston, rings, pin and clips

Single row deep groove ball bearings are versatile, self-retaining bearings with solid outer rings, inner rings and ball cage assemblies. They are simple in design robust in operation and easy to maintain.

- Capable of supporting radial and moderate axial loads in both directions (sealed for life bearing)
- Super finished raceways improves lubrication and bearing life
- Operating temperature -10 to 100°C

High Performance Snowmobile Engine Gasket Sets

- Vertex manufactures high quality gaskets for the two cycle engine industry in its modern computer controlled facilities in the USA.
- Vertex's extensive range of hight tech materials provide unmatched reliability and performance for the demanding needs of todays power plants.
- Vertex's distributes products to over 35 countries on six continents. This exposure to varying fuels and climates is the ultimate field test.
- Vertex's performance oil seals have a high chromium content stainless steel alloy spring for maximum performance and corrosion resistance.

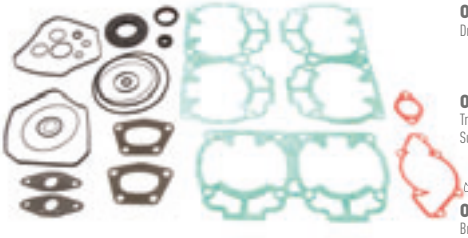
Top End Gasket Set

- Designed for piston replacement
- Include the head, base, exhaust pipe and upper end gaskets
- Gaskets and o-rings for power valve rebuild also included
- Does not include formed rubber valve cover gaskets
- Multi cylinder machines include enough components to rebuild all cylinders

Engine Gasket Sets



Professional Engine Gasket Sets

Set with 711 prefix
- 711 sets contain ALL gaskets necessary for professional engine rebuilding including Vertex's High performance oil seals.
- Vertex prides itself on having the most complete sets available.

Complete Gasket Set with Oil Seals - 811

This set includes all gaskets and oil seals necessary to rebuild the engine and transmission.
- Dirt/ATV (811) sets include all OEM specified gaskets, O-rings, and engine oil seals for to rebuild the engine and transmission including output shaft, water pump, clutch, shift and starter seals
- Includes formed rubber valve cover gaskets
- Does not include mechanical water pump seals

- Designed for mid-power snowmobiles
- Custom built to very tight tolerances
- Individually inspected for quality & fit
- High performance rubber compounds
- High performance Aramid cord construction
- Special cog design
- Top and bottom cogs provide flexibility and runs cooler

Aramid Cords

Aramid fibers are stronger than steel and assures length stability

Cut Edge Construction

Provides firm grip and less vibration

Molded Cog

Excellent flexibility results in less heat build-up and longer belt life

Detailed Construction

- **DOUBLE COGS** - Top and bottom cogs make belt extremely flexible
- **ARAMID CORDS** - Pound for pound, stronger than steel, no stretch and no shrinkage even under violent shock loads and low temperatures
- **FIBER REINFORCED RUBBER** - Excellent lengthwise flexibility and transverse rigidity in tough driving conditions. Great wear resistance
- **BOTTOM COVER** - Super cracking resistance, even over small sheaves at extremely low temperatures

Kimpex Pro Series Belt

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS VISIT **ORDER.KIMPEX.COM**

- Made from super tough "Aramax®" cord which is three times more resistant than steel
- New stricter tolerances for better power to track transfer
- Excellent flexibility even at the lowest temperatures
- Built to OEM standards
- Backed by Kimpex's 100% customer satisfaction guarantee
- Full one year warranty against defects
- For applications, see reference chart

Aramax® Cords

Incredible length stability and several times stronger than steel cord

Cut Edge Construction

Providing firm grip and less vibration running with precise topwidth angle

Molded Cog

Excellent flexibility results in less heat build-up

Detailed Construction

- **TOP COVER** - Extremely flexible, giving belt protection without losing flexibility
- **ARAMAX® CORDS** - Pound for pound, much stronger than steel, almost no stretch and no shrinkage even under violent shock loads and low temperatures
- **FIBER REINFORCED RUBBER** - Excellent lengthwise flexibility and transverse rigidity in tough driving conditions. Great wear resistance
- **BOTTOM COVER** - Super cracking resistance, even over small sheaves at extremely low temperatures

High Performance Snowmobiles Drive belt

- Designed for high horsepower sleds
- Delivers superior performance, dependability and reliability
- Made of specially formulated rubber compound and aramid tensile cort
- Double cogged construction dissipates heat and aids flexibility
- Better flexibility reduces heat
- Cooler running means better performance and longer belt life
- One Year Warranty
- Made in the U.S.A.

Aramid Cords

Aramid fibers are stronger than steel and assures lenght stability

Cut Edge Construction

Provides firm grip and less vibrations

Molded Cog

Excellent flexibility results in less heat build-up and longer bolt life

Detailed Construction

- **DOUBLE COGS** - Top and bottom cogs make extremely flexible
- **ARAMID CORDS** - Pound for pound, stronger thant steel, no stretch and no shrinkage even under violent shock loads and low temperatures
- **FIBER REINFORCED RUBBER** - Excellent lengthwise flexibility and transverse rigidity in tough driving conditions. Great wear resistance.
- **BOTTOM COVER** - Super cracking resistance, even over small sheaves at extremely low temperatures

Ultimax Drive Belts

Ultimax XS

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT **ORDER.KIMPEX.COM**

Knowledgeable snowmobilers agree - the drive belt of choice for high performance is Ultimax XS. XS is designed for high horsepower sleds and delivers superior performance and longer belt life. XS features a specially formulated rubber compound found in no other snowmobile belt. Tests prove that XS transfers more power and runs cooler. For high performance sleds, capture the power with Ultimax XS.

Ultimax PRO

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT **ORDER.KIMPEX.COM**

The new Ultimax Pro belt features a thicker cross section so more surface area contacts the clutch. This means less slippage over a broader speed range for quicker acceleration. The new cog design dissipates heat and aids flexibility. Cooler running belts mean better performance and longer lasting belts. Run cool, run long, run fast with Ultimax.

Ultimax MAX

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT **ORDER.KIMPEX.COM**

The Max belt is designed for general service machines 500cc and under. The new Max has an improved cog design for greater flexibility and cooler running. The new thicker Max has added strength that provides longer belt life.

MAGENTA Part numbers are New for 2024

Troubleshooting

Problems	Causes	Solutions
1. Uneven belt wear on one side only	A. Pulley misalignment	A. Align pulleys
	B. Loose engine mount(s)	B. Replace or tighten engine mount
	C. Rough or scratched pulley surface	C. Grind or polish pulley(s)
2. Belt glazed excessively or has baked appearance	*Excessive slippage caused by:*	
	A. Insufficient pressure on belt sides	A. Check driver pulley for smooth actuation
	B. Excessive horsepower for belt and converter	B. Consult dealer
	C. Excessive oil on pulley surfaces	C. Check bearing seals and clean pulley surfaces
	D. Insufficient pre-load on riven spring	D. Consult Operator's Manual
	E. Excessive operation in low gear position	E. Inspect converter
3. Belt worn excessively in top width	A. Excessive slippage	A. Check driver pulley for smooth actuation
	B. Rough or scratched pulley surfaces	B. Grind or polish pulleyst
	C. Improper belt angle	C. Consult dealer
	D. Considerable use, belt wearing out	D. Replace belt
4. Belt worn narrow in one section	*Excessive slippage in driver pulley caused by:*	
	A. Locked track	A. Rotate track by hand until free
	B. Converter not functioning properly	B. Repair or replace converter
	C. Engine idle speed too high	C. Reduce engine RPM
5. Belt too tight during engine idle	A. Idle speed too high	A. Reduce engine RPM
	B. Incorrect belt or belt length	B. See Operator's Manual
	C. Incorrect drive center distance	C. See Operator's Manual and reduce center distance
	D. Idle bearing seized	D. Replace bearing
6. Concave worn belt side(s)	A. Excessive ride-out on driver pulley	A. Repair or replace driver pulley
	B. Drive misalignment	B. Align pulleys
	C. Rough or scratched pulley(s) surface	C. Grind or polish pulleys
	D. Excessive slippage	D. Repair or replace driver pulley
7. Belt disintegration	A. Excessive belt speed	A. Reduce engine RPM at high speed
	B. Sheave misalignment causing belt flip-over	B. Align sheaves
	C. Excessive slippage causing heat build-up in belt	C. Inspect converter
	D. Excessive operation in low gear position	D. Inspect converter
8. Belt flip-over at high speed	A. Pulley misalignment	A. Align pulleys
	B. Excessive belt speed	B. Reduce engine RPM
	C. Excessive ride-out on driver pulley	C. Repair or replace driver pulley
	D. Incorrect belt length	D. See Operator's Manual
9. Belt edge cord broken	A. Pulley misalignment	A. Align pulleys
	B. Improper belt installation	B. See Operator's Manual
	C. Engagement speed too high	C. Reduce engine speed
10. Flex cracks between cogs	A. Considerable use, belt wearing out	A. Replace belt
	B. Bent pulley(s) flange causing belt flutter	B. Repair or replace pulley
	C. Excessive operation in low	C. Inspect converter
	D. Extremely low temperature	D. Warm up belt slowly
11. Sheared cogs, compression section fractured or torn	A. Improper belt installation	A. See Operator's Manual
	B. Belt rubbing stationary object	B. Check drive components
	C. Idler bearing seized	C. Replace bearing
12. Broken belt	A. Engagement RPM too high	A. Reduce engine RPM
	B. Belt hanging up in the bottom of driven pulley	B. Belt too short, replace
	C. Locked track	C. Rotate track by hand until free

Use What the Pros Use

Official belt of the CSRA Snow Cross Racers

RPX MC

The All New RPX Race Series Belt from Dayco.

- Quicker Throttle Response
- Reduced Belt Slippage through RPM Range
- New Compound Allows for Quicker Upshifts & Downshifts for Improved Engine Braking
- More HP Delivered to the Track
- Lower Belt and Sheave Temperatures

Dayco HPX

Dayco® HPX (High Performance Extreme) Snowmobile Belt

Designed for use on high horsepower snowmobiles

Featuring Dayco's Top Cog® design for increased flexibility and longer belt life, this high horsepower belt is constructed with oversized aramid cords and CVT rubber compounding to deliver the increased strength and durability that's required to stand up to today's higher snowmobile engine RPM's and operating temperatures.

Dayco XTX

Dayco® XTX (Extreme Torque) Snowmobile Belt

Introducing the most powerful belt built for the most extreme machines

Bred from a rich history of experienced belt builders, the XTX is specifically engineered to maximize the performance of high horsepower snowmobiles. Beating the competition on the race course is just one of many aspects that set the XTX belt apart from its competition. Specially formulated high temperature Polymer along with the highest level of engineered reinforcement proves to perform better in belt operating temperature and efficiency than leading competitors. Its innovative break-through design of deeper cogs on top and rounded cogs on the bottom yield the advantages of ultimate flexibility and longer belt life.

Dayco RPX

Dayco RPX™ Racing Snowmobile Belt

The all new Dayco Racing RPX™ belt, the official belt of the CSRA Snow Cross Racers was specifically engineered to provide maximum performance under the most extreme racing conditions. Beating the competition on the race course is just one of its several advantages. The RPX™ belt is made up of a specially blended polymer compound, making it the strongest aramid belt available in the market today.

Dayco CTX

Power CTX Snowmobile Belt

Constructed for heavily modified vehicles with over 800cc engines, including deep snow/ mountain snowmobiles with turbos, long tracks and tall paddles, as well as high horsepower sleds with performance modifications.

The revolutionary Dayco POWER CTX Snowmobile Belts are changing the powersports game with an exclusive design proven to outperform and outlast Original Equipment belts. Specially engineered for new, extreme performance snowmobiles, the Dayco POWER CTX Snowmobile Belts feature the highest level of aramid reinforced HNBR rubber for maximum lateral rigidity and higher temperature resistance, coupled with a patented carbon hybrid cord that offers maximum strength and adhesion to the HNBR rubber compound for the prevention of cord pop out failures. Dayco POWER CTX Snowmobile Belts provide the most aggressive riders with the best in grip, power, braking and acceleration, as they are designed to withstand the higher torque and heavier loads often associated
with heavily modified snowmobiles.

Gates Drive Belts

G-Force Belts

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT ORDER.KIMPEX.COM

Designed using Finite Element Analysis (FEA) techniques, the latest construction, materials and measuring technology G-Force® drive belts are designed for superior fit, performance and durability for today's recreational and utility all-terrain equipment. Identical to OEM, G-Force® belts are constructed with double or single cog designs to match the OEM belt. Extreme testing, in controlled environments as well as on race vehicles, has proven the G-Force® belt to be high performing and durable, with no clutching adjustments necessary at installation.

- OEM constructed drop-in belt with no clutching adjustments
- Tested under extreme conditions in controlled environments as well as on race vehicles
- Viability testing completed to match shift curves
- Dynamometer testing proves G-Force® belts outlast other high-performance belts by as much as five times
- Advanced aramid tensile cords and reinforced fiber loaded undercord are used in construction for durability and dependability
- Proprietary measuring technology assures exact fit

G-Force Carbon Belts

FAST LANE ORDER.KIMPEX.COM
FOR UP-TO-DATE APPLICATIONS
VISIT ORDER.KIMPEX.COM

G-Force C12 by Gates is an extreme-performance Neoprene (CR) belt which offers Original Equipment technology featuring trapezoid top-notch and rounded cog design for superior flexibility and heat dissipation. Carbon Cord belts are engineered for drop-in performance utilizing the strongest material on earth for tensile cord. Combined with a specially formulated adhesion gum, edge cord pullout is virtually non-existent.

- Carbon Tensile Cord ensures the belt maintains its designed length and geometry
- Superior resistance to edge cord pull out
- Unique attributes of the Carbon Cord decreases the chance of edge cord pull out
- Less likely to damage clutches during belt failure
- Enhanced long term performance
- Improved durability over G-Force Aramid
- Minimal to no stretch under load creates optimal power transmission
- Improved response during acceleration
- Consistent shift characteristics over time and through complete shift ratio
- Un-paralleled response during high load acceleration

G-Force Redline Belts

- Greater heat resistance and recovery, even under severe duty cycles
- Optimized, patented EE (Ethylene Elastomer) compound maximizes axial stiffness enabling belts to run at higher continuous torques or loads
- Innovative design results in better acceleration, higher top speeds, less speed ratio and energy loss in extreme off-road environments
- Improved durability, crack and wear-resistance means a longer-lasting, high-performance power transmission belt for the most demanding applications
- Reduced Environmental Risk - made without harmful chlorinated compounds

SnoBunje Cobra

Snobunje Cobra is sled-to-sled pulling tool that can produce and hold hundreds of pounds of pulling force on a stuck snowmobile. It is made of stretch cord bundled in a corrugated vinyl tube with a hook on both ends. Snobunje pulling tools work to reduce the weight of a stuck snowmobile so that the sleds track can once again move the sled.

- Can be used as a snatch strap
- Creates 300 lb. to 400 lb. of static pulling force
- Cobra strap **#300828** and 2-S- Hook Shape Safety straps **#300820** are included

Part No.	Description
300817	SnoBunje Cobra

Cobra Adaptor Strap

This is a strong 15" strap sewn into a small and large loop. It is primarily used as a hitch to attach Snobunje pulling tools to a sled. It is also very useful as a wrist strap when lifting the back of a sled or in tying-down ATV's.

- Included with the Snobunje Cobra

Part No.	Description
300828	Cobra Adaptor Strap

S-Hook Safety Strap

These items keep the S-hooks on the Snobunje 'Rattler' and 'Cobra' in place. These soft rubber straps can stretch over the end of the S-hook to keep it in place when pulling.
*Pack of 4

Part No.	Description
300820	S-Hook Safety Strap

Tow Products

Slicktape Retrieval Line

A slick way to use Snobunje Rattler and Cobra. Use this 20' long Retrieval Line to reach the stuck sled and to give you the room to properly use Snobunje pulling tools. Slip the loop of the black line over the back of the stuck sleds ski and up against the back of the ski's spindle. Pull from the other and of the line. Developed from the same technology that gave us 'Kevlar', this super strong, super lite 20 foot towline has a 2500 pound tensile strength, fits in the palm of your hand and stores in a small nylon bag.

Part No.	Description
300819	Slicktape Retrieval Line

SnoBunje Rattler

Snobunje Rattler is a hand tool that uses very strong stretch cord bundled in a corrugated vinyl tube. It has a hook on one end that attaches to the ski of the stuck sled and a handle on the other end. It is a tool that maximizes the pulling force your body can produce when pulling out a stuck snowmobile. Snobunje pulling tools work to reduce the weight of a stuck snowmobile so that the sleds track can once again move the sled.

- S-Hook Safety Strap included
- Pull farther
- Pull easier
- Time your throttle response to the pulling action.

Part No.	Description
300816	Snobunje Rattler
300829	Replacement Handle

T & A Strap (Turning & Adaptor)

The Snobunje turning and adapter strap, safely applies pulling force to a ski. Loop one end of the strap over the back of the stuck sleds ski and pull it up against the back of the ski spindle. Pull with your Snobunje Rattler or Cobra from the other end. The T&A Strap will slip off of the back of the ski, turning the sled loose as it comes out.

- Allows you to hook up to a ski so that you are pulling on the ski spindle
- Release the sleds ski as the stuck sled comes out.

Part No.	Description
300818	T & A Strap

Throttle Flares and Remote

Throttle Flares

The Throttle Flare installs over your throttle thumb lever, increasing the amount of control surface a rider's throttle hand may contact. Using Throttle Flare, you'll find you will be able to apply a quicker more consistent throttle response using several new throttle hand positions, greatly improving your ability to apply your body's weight where needed in the steering effort.

Part No.	Description
300827	Throttle Flare - Black
300830	Throttle Flare - Red
300831	Throttle Flare - Yellow

Throttle Flare Display

4 of each color (Black, Red, Yellow) plus one free black flare.

Part No.	Description
300832	Throttle Flare Display

Remote Throttle Control

Stuckmate is a snowmobile accessory for use when your sled is stuck that allows you to operate the throttle while pulling on the ski – giving you that extra hand when you need it.

- Universal design fits all brands
- Easy to use – could save a life
- Ideal addition to emergency gear
- Safe break-away design
- Quick hookup and disconnect
- Comes in small storage bag
- Weighs less than a pound

Safety Flags (Firestik)

100% Oxford polyester red safety flag mounted on a flexible 3/8" fiberglass rod. The colorful PVC shrink tubing protects each rod from sun-splintering and deterioration, in addition to providing increased durability and enhanced color visibility. Our special composite blend of fiberglass and resin makes our rod the most durable choice for any safety flag application. The 3/8"-24 threaded base is compatible with a large variety of brackets, mounts, springs, quick disconnects and other mounting hardware. Flag is removable and/or replaceable and rotates freely on the rod.

Heater Grips

(Thumb Throttle Applications)

"The LED indicator with multi-levels will help you get the right heat adjustment! In order to get enough power to start your engine, our new technology with ''Low voltage warning'' will automatically shut-off the heated grips in case the voltage goes under 12V. Also, the ''Short circuit protection'' will help avoid damages to the control by cutting-off power to the grips in case of short circuit. Available for your ATV or snowmobile; those new heated-grips will keep your hands warm whatever the outside temperature! The LED indicator with multi-levels "

Communication Systems

UCLEAR

Motion Series Bluetooth Helmet Audio System

The UCLEAR Motion Series is based on direct feedback from riders, dealers, and industry experts to be the most advanced, easiest to use, most durable, most portable, best sounding, longest lasting and weatherproof comm systems, ever. It's bleeding-edge tech made simple to use, then ruggedized. With an industry-first motion sensor, you no longer need to press any buttons to perform simple functions such as pause/play, volume, etc. Enhance your rides with UCLEAR's patented DynaMESH intercom, powerful music, or crystal clear phone calls on any trail, in any weather, on any helmet.

MOTION SERIES TECHNOLOGY

U-SAFE

The revolutionary **USAFE** uses an advanced accelerometer to detect and measure hard impacts. If you are unresponsive, **USAFE** can alert your contacts of your situation and GPS location. Requires a connected GPS enabled mobile device.

GESTURE CONTROL

Exclusive **GESTURE CONTROL** sends out a sensor beam from your MOTION unit allowing simple hand gestures to command the most common features such as volume and pause/restart music without touching the actual control unit. Winter gloves? No problem!

U-PROMPT

UPrompt: Voice confirmations of user inputs.

U-MOVE

UMOVE: Exclusive motion sensor powers your Motion Series unit on and off. Motion is on by the time you put on your helmet, and automatically shuts your Motion off if you forget.

DYNAMESH

DYNAMESH: The first ever mesh intercom network combined with Multi-Hop automatic switching. **DYNAMESH** pairs with mesh and non-mesh units, and auto-reorganizes as group riders change positions. This ensures stable and constant connections over the longest distances allowed by the FCC.

U-COMMAND

UCommand: Control your Motion Series unit by natural voice connected through Apple Siri or Google Voice. Speech engine accuracy constantly updates through the cloud.

U-PAIR

U-Pair allows universal device pairing to multiple Bluetooth devices at once. Smart phones, smart watches, tablets, GPS, action cams, OEM systems, and competitors' comm systems.

E-Z BUTTON

1-touch access to most commonly used advanced features such as group intercom pairing, voice commands, or quick access to Apple Siri or Google Voice. **It's E-Z!**

CLEARLink MOBILE APP

Advanced features, preference settings, support, and our exclusive wireless firmware updates. Music sharing, music + intercom overlay, noise cancellation settings, etc.

Part No.	Description
01-555-01	1 RCA Plug
01-555-02	2 RCA Plugs

MARINCO

12V Receptacle and Plug

The SeaLink 12 volt family of products are manufactured from corrosion resistant marine grade materials. Exclusive to SeaLink products is a unique interconnecting system that securely locks the plug into the receptacle resulting in a positive and moisture-proof connection. The plug and receptacle feature optimized metal connection points for maximum conductivity.

Plug:
- Moisture proof sealing ring
- LED power indicator light
- Interchangeable 10A fuse
- Internal strain relief and cord seal
- Compatible with standard 12V receptacles
- Max rating is 10 amps

Receptacle:
- Watertight sealing cap
- SeaLink locking system
- Easy to install, with supplied mounting plate for front panel installation, or locking ring for rear access installation (Mounting plate not included)
- Compatible with standard 12V plugs

Part No.	OEM No.	Description
707021	12VPK	12V Receptacle and Plug
707022	12VRC	12V Receptacle

Caliber Trailer Products

LowPro GripGlides™

Great for tilt trailer and enclosed trailer door

- LowPro GripGlides features grips for ATV tires and glides for Snowmobiles
- Low profile design allows your trailer to be used for multiple purposes with minimal interference
- HDPE plastic greatly reduces the friction between ski and trailer, making loading & unloading effortless
- LowPro GripGlides are 9" wide to accommodate up to a 14" ski stance variance and all dual carbide wear rods
- LowPro GripGlides are suspended off the deck of the trailer and feature water and dirt passageways for easy cleanup
- Protects trailer from carbide gouges and water damage
- Extensions Kits are available to complete 12 foot trailers, ramps etc. (4-30" pieces per kit)
- Covered by Caliber's Lifetime Limited Warranty

Solenoid for Winches

Solenoid to connect 2 remotes at winches numbers following:
458210, 458211, 458212, 458243, 458244 & **458245.**

Part No.	Description
458219	Replacement Solenoid

Winch Remotes

Design for winches of number Kimpex following:
458210, 458211, 458212, 458243, 458244 & **458245.**

Part No.	Description
458221	Replacement Wireless Remote

Portable Electric Winch

- 2500 pounds capacity
- Remote control included
- Hand crank for manual use
- Include power battery cables
- Heavy duty 5.4 mm gage steel cable of 30ft/9m of length
- 12 V DC motor, 25 amps, 300 W input power
- Carrying bag included

Part No.	Description
258024	Portable Electric Winch

Winch Accessories Kit

Everything needed for maximising the efficiency of your winch!

Included:
- A pair of 1/2" shackles 2 ton weight rating
- A pair of 1 in.x 8 in. 10,000 lbs tow straps
- One snatch block with a 9,000lbs rating
- One bag

Winch Fairleads

Fairlead for 2500/3500 lbs Winch

- The bottom roller is bigger, makes the adjustment of the cable easier
- For a better performance of the roller, there is a bearing in each roller

Part No.	Description
078470	Fairlead for 2500/3500 lbs Winch

Fairlead for 2500/3500 lbs Winch

Roller fairlead for winches numbers **458210** & **458211**.

- Universal cable hawse for winch 2500/3500 lbs
- Aluminium material composition
- Black powder coat paint
- Steel construction body fairlead
- Steel roller with zinc covering

Part No.	Description
458216	Fairlead for 2500/3500 lbs Winch

Fairlead for 4500 lbs Winch

- Universal fairlead design for 4500 lbs winch
- Material: Aluminium
- Use with synthetic cable

Part No.	Description
458215	Fairlead for 4500 lbs Winch

Cable Hawse for 2500/3500 & 4500 lbs Winches

- Aluminium material composition
- Universal for winch 2500/3500 & 4500 lb.
- Designed for synthetic rope

Part No.	Description
458214	Synthetic Rope Hawse for 2500/3500 & 4500 lbs Winches

Radial Trail RH Tire & Rim Assembly White

NEW. Carlisle's newest and best performing radial trailer tire.

A best-in-class trailer tire, radial construction and variable pitch design promotes tire stablility and reduces excessive heat build-up, increasing tire life. Tire profile and tread compound formulation create lower rolling resistance and increased fuel mileage. Equipped with the DuraTrail high strength belt package and HeatShield heat resistant compounding technologies. A proven leader both in field tests and by independent laboratory testing.

The Carlstar Group LLC

Sport Trail LH Tire only

New & Improved, Durable & Affordable

The Carlisle Sport Trail LH Bias Ply Trailer Tire, a long-time value leader in the trailer tire industry, has been redesigned with an innovative, modern tread design, reduced rolling resistance, and improved contour, for extended tire life, consistent tire wear and optimized performance. The bias ply construction of the Sport Trail LH is optimal where rugged performance and sidewall puncture resistance is required - trailers for construction, utility, agriculture, light marine, light travel, cargo and sports.

The improved, wider shoulder provides improved contact under loaded conditions and serves to resist lateral scrubbing. Laboratory and field testing results confirm a smoother ride, more consistent wear, stability at highway speeds and enhanced security for your towed vehicle

Radial Trail RH Tire only

NEW. Carlisle's newest and best performing radial trailer tire.

A best-in-class trailer tire, radial construction and variable pitch design promotes tire stablility and reduces excessive heat build-up, increasing tire life. Tire profile and tread compound formulation create lower rolling resistance and increased fuel mileage. Equipped with the DuraTrail high strength belt package and HeatShield heat resistant compounding technologies. A proven leader both in field tests and by independent laboratory testing.

Trailer Lights

Wesbar

Submersible "Under 80" Tail Light

These "Under 80" submersible tail lights protect bulbs and contacts when the boat trailer is under water during launching and loading. Gasketed lenses provide the necessary seal to employ a "trapped air" technique to keep water from the bulbs. Both bulbs and lenses are easily replaceable. Bottom splashguard provides additional bulb protection during launching and loading and deflects road grit.

Part No.	OEM No.	Description

Connectors

Adapter LED Lamp

Wire up your tow vehicle and trailer with whatever it takes to get your trailer lights on, the electric brakes slowing down, and the trailer battery charging. From simple wiring connectors, to connectors and harness that lets you plug directly into your tow vehicle harness, to adapters that let your 3-wire car turn signals successfully operate your 2-wire trailer lights, we have the electrical solutions for your towing needs.

Part No.	OEM No.	Description

Straps & Tie-Downs

Soft Loops

The 18" soft loop is designed to work with any type of Tie-Down that you are using(specifically the Cinchtite 1 and 2). It can be used to either loop, or create a slip knot, at any appropriate attachment point of the recreational vehicule and then attach to the S Hook of the strap. This accessory makes securing easier and prevents scratching of your paint or chrome.

Part No.	Description
914010	Soft Loop (2 per package)

Handle Straps

The Handle Strap is design to fit over the handle of your vehicule and secure to either the Cinchtite 1 and 2 tie-down series. The diameter of the handle must be less than 2.5" for this accessory to fit your use.

Part No.	Description
914009	Handle Strap (2 per package)

Kwik Straps

Similar in function to the Soft Loop this premium Accessory is made with round sling material to add a "little give" over the rougher terrain. As a sling, it ensures that tugging and pulling does not damage your recreational vehicule. This 12" Kwik Strap works well with any type of Tie-Down you are using (specifically the Cinchtite 1 and 2).

Part No.	Description
914011	Kwik Strap (2 per package)

Ratchet Buckle with 12' Web

Econopack designed to give you 4 utility straps in one package these light duty 1" ratchet tensioning straps are ideal for securing loads, bicycles boxes or any other item that you want to ensure doesn't move. Straps come complete with vinyl S hooks.

Part No.	Description
914035	Ratchet Buckle with 12' Web

Cam Buckle with 6' Web

Econopack designed to give you 4 utility straps in one package. These light duty 1" cam tensioning straps are ideal for securing loads, bicycles, boxes or any other item that you want to ensure doesn't move. Straps come complete with vinyl S hooks.

Pan Fittings & Tracks

Recessed Mount Heavy-Duty

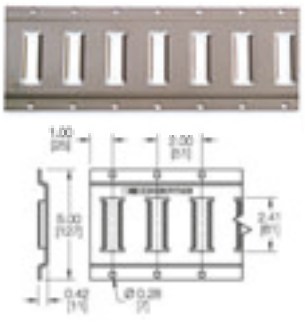
This Heavy Mount Duty Pan Fitting is zinc plated and recessed for a flush surface.
The **914018** has a working load limit of 1,667lb./756kg at 45 degrees of pull.

Part No.	Description
914018	Recessed Mount Heavy-Duty (2 per package)

D-Ring Kits

- Powerful Retail Presence fo Dealers
- Each pack includes 2 D-Rings
- Rated to 5,000 lbs
- Kit includes all hardware
- Flush mount so it doesn't interfere with your cargo
- Available in Stainless Steel or Zinc Plated
- Backer plate included, standard

Part No.	OEM No.	Description
201805	13520	D-Ring Kit Zinc Coated Steel
201806	13521	D-Ring Kit Stainless Steel



Serie E Trailer Track

Same high quality as the galvanized track but is powder coated. Series E track is the most popular track and is mounted in the floor or walls of trailers.

Part No.	OEM N0.	Description
914001	43002-060	Trailer Rack 5'

Engine Oil

SNOW 2 Stroke Mineral

Mineral low ash engine lubricant, strengthened with the latest additives technology for maximum wear protection. Formulated for conventional air-cooled or liquid cooled Snowmobiles using premix or oil injection system. Flows down to -45°C/-49°F. Meets the 2 STROKE certification: API TC.

Part No.	OEM No.	Description
260600	DRA101K	Low Ash Mineral Lubricant - 946ML
260601	DRA102K	Low Ash Mineral Lubricant - 3,78L
260602	DRA104K	Low Ash Mineral Lubricant - 205L

SNOW 2 Stroke Synthetic

Synthetic low ash and **low smoke** engine lubricant, strengthened with the latest additives technology for maximum wear protection and minimum carbon build up. Formulated for modern Snowmobiles equipped with direct or semi-direct fuel injection system and power valves. Designed for intensive use in trail riding. Flows down to -45°C/-49°F. Meets the latest independent 2 STROKE certifications as requested by all manufacturers: ISO L-EGD and JASO FD.

Part No.	OEM No.	Description
260626	DRA109K	Low Ash & Smoke Synthetic Lubricant - 946ML
260627	DRA110K	Low Ash & Smoke Synthetic Lubricant - 3,78L

SNOW 4 Stroke 0W40 100% Synthetic

100% synthetic generation engine lubricant, strengthened with the latest additives technology for maximum wear protection and thermal stability. Formulated for modern high RPM and TURBO Snowmobiles. Designed for intensive use in trail riding. Flows down to -47°C/-52°F. Meets the latest independent 4 STROKE certifications as requested by all manufacturers: API SM and JASO MA.

Part No.	OEM No.	Description
260612	DRA316K	100% Synthetic Lubricant 0W40 - 946ML
260613	DRA317K	100% Synthetic Lubricant 0W40 - 3,78L
260614	DRA318K	100% Synthetic Lubricant 0W40 - 205L

SNOW 4 Stroke 5W30 Mineral

Mineral engine lubricant, strengthened with the latest additives technology for maximum wear protection. Made for conventional air-cooled or liquid cooled Snowmobiles. Flows down to -40°C/-40°F. Meets the latest independent 4 STROKE certifications as requested by all manufacturers: API SM and JASO MA.

Part No.	OEM No.	Description
260623	DRA304K	Lubricant 5W30 - 946ML
260624	DRA305K	Lubricant 5W30 - 3,78L

Snowbike Full Synthetic Oil 0W-40

- Fully synthetic low-friction motor oil
- Ensures the fastest oil penetration of the engine
- Optimum engine lubrication starting with the first turn of the engine
- Specially adapted to the requirements of 4-stroke engines in snowbikes

Part No.	OEM No.	Description	Case Qty
153346	20356	0W40 - 1L	6
153347	20358	0W40 - 4L	4

Fork Oil 5W Light

- Prevents seals from swelling
- Prevents foam formation
- Good corrosion protection
- High wear resistance
- Better drivabilit

Part No.	OEM No.	Description
153272	20094	Fork Oil 5W Light - 1L

Lubricants & Engine Flush

Brake Fluid Super DOT 4

Specially formulated to exceed all U.S. Department of Transportation (DOT) 3 & 4 specifications and SAE J1703 and FMVSS 116 specifications. What this means to you is exceptional resistance to vaporlock and maintaining consistent lever "feel" during hard brake use.

- Available in 12 oz. (355 ml) bottles.

Part No.	Description
050302	DOT 4 Brake Fluid 12 oz.

Brake Fluid Silicone DOT 5

High performance replacement for American made cruisers that have DOT 5 Silicone as the original brake fluid. Will not affect plastic or painted surfaces. It does not absorb water - the main enemy of brake fluids – and has an extremely high boiling point of 500°F (260°C) Exceeds DOT 5 and FMVSS 116 specifications.

- Available in 12 oz. (355 ml) bottles.

Part No.	Description
050304	DOT 5 Silicone Brake Fluid 12 oz.

Bel-Ray Waterproof Grease

Completely waterproof even in salt water. Due to its aluminum complex formula, Waterproof Grease won't melt or run out. Extremely long lasting, it's formulated for use in wheel bearings, bushings, shock linkage pivots and chassis lubrication.

- Available in 16 oz. (454 gram) tubs

Part No.	Description
050310	16 oz. container

Motorbike Engine Flush

Cleaning fluid for clearing the engine interior of troublesome deposits. Dissolves sludge and lacquer formers. All types of oil-soluble and oil-insoluble residues are brought into suspension and removed during the next oil change. An engine which has been cleaned of deposits and contamination and which is then filled with fresh oil not contaminated with old impurities can develop its full performance characteristics.

Part No.	OEM No.	Description
153274	22098	Motorbike Engine Flush 250 ml

Fuel Additives

Motorbike Gasoline Stabilizer

Preserves and protects fuel against aging and oxidation. Prevents corrosion throughout the entire fuel system. Prevents problems from occurring when motorbikes, motor scooters, ATVs, snowmobiles and other gasoline-driven 2-stroke and 4-stroke engines are decommissioned. Increases operational reliability. The product has a lasting effect.

Part No.	OEM No.	Description
153280	22102	Motorbike Gasoline Stabilizer 250 ml

Motorbike 4T Additive

Increases engine performance. Removes deposits in the fuel system, on valves, spark plugs and in the combustion chamber and prevents renewed formation. This also reduces fuel consumption. Protects the entire fuel system from corrosion. Prevents carburetor icing. Cat tested.

Part No.	OEM No.	Description
153273	22096	Motorbike 4T Additive 125 ml

Motorbike Speed Additive

State-of-the-art, ash-free combination of agents with acceleration-enhancing, cleaning, dispersing and material-protecting properties. The product has been formulated using state-of-the-art additive and fuel technologies in accordance with the requirements of today's engines, fuels and running conditions. Ensures increased driving enjoyment due to optimized performance. The engine starts easier and also runs smoother.

Part No.	OEM No.	Description
153285	22104	Motorbike Speed Additive 150 ml

MAGENTA **Part numbers are New for 2024**

Fuel Additives

Star Tron Gasoline Additive, Small Engine

- Cures and prevents most ethanol problems
- Makes all engines start easily, run smoothly; improves performance
- Removes and prevents gum, carbon and varnish
- Works in all engines and in all fuel
- Helps prevent phase separation by dispersing water throughout fuel as submicron-sized droplets that are safely eliminated while the engine operates
- Stabilizes fuel; helps rejuvenate old fuel
- 1 fl. oz. treats 6 gallons of fuel
- Reduces smoke and all other emissions
- Keeps fuel delivery system clean

Part No.	OEM No.	Description
781997	14308C	Star Tron Gasoline Additive Small Engine - 8 oz

Star Tron Gasoline Additive

736904

- Cures and prevents most ethanol problems
- Makes all engines start easily, run smoothly; improves performance
- Removes and prevents gum, carbon and varnish
- Works in all engines and in all fuel
- Helps prevent phase separation by dispersing water throughout fuel as submicron-sized droplets that are safely eliminated while the engine operates
- Improves performance and fuel economy.
- Stabilizes fuel; helps rejuvenate old fuel
- 1 fl. oz. treats 16 gallons of fuel
- Reduces smoke and all other emissions
- Keeps fuel delivery system clean

Part No.	OEM No.	Description
736904	093008PC	Star Tron Gasoline Additive - 8 oz
730279	093016C	Star Tron Gasoline Additive - 16 oz
700348	093032C	Star Tron Gasoline Additive - 32 oz

Star Tron Diesel Additive

- Helps increase fuel economy
- 1 fl. oz. treats 32 gallons of diesel fuel
- Makes engines start easier, run smoother
- Cannot be overdosed
- Disperses bacteria without the use of poisons/biocides
- Reduces all emissions, including carcinogenic, particulate smoke – eliminates diesel soot
- Stabilizes diesel fuel for up to two years
- Lowers fuel system maintenance
- Eliminates carbon build-up from burners, injectors and exhaust components

Part No.	OEM No.	Description
736897	093108C	Star Tron Diesel Additive - 8 oz

Star Tron Enzyme Fuel Treatment

- Small Engine Formula #143 is easy to mix in small applications under 48 gallons.
- 1 fl. oz. treats 6 gallons of fuel. (8oz. bottle treats up to 48 gallons.)
- Cures and prevents ethanol fuel problems.
- Makes engines start easily and run smoothly.
- Stabilizes gasoline for up to 2 years and rejuvenates old fuel.
- Removes and prevents gum, varnish and carbon deposits.
- Improves performance and fuel economy.
- Helps prevent phase separation by dispersing water into submircron-sized droplets.
- Overdosing not harmful.

Part No.	OEM No.	Description

Fuel Treatments

Fuel Stabilizer

- Keeps stored gasoline and diesel fresh for easier starts next season
- Prevents rust, corrosion, gum and varnish buildup
- For use in 2 and 4 cycle engines
- 236 ml

Part No.	OEM No.	Description
720888	76063*	Fuel Stabilizer

**** Commerical Grade***

PhaseGuard4™ Ethanol Fuel Treatment

CRC PHASEGUARD4™ Ethanol Fuel Treatment protects all 2- and 4- cycle vehicles and equipment from the damaging effects of ethanol in gasoline.

- PREVENTS PHASE SEPARATION.
- PROTECTS against corrosion.
- CLEANS the entire fuel system.
- STABILIZES fuel for long-term storage.
- Equally effective in E10 to E85 fuel.
- 30 mL treats 37 liters

Part No.	OEM No.	Description
721054	07142	16 fl oz

Fuel Stabilizer

Inhibits the formation of varnishes, peroxides & gums in gasoline, diesel fuel & aviation fuel during storage. Does not contribute to induction system deposits.
Super concentrated formula keeps fuel fresh for up to one year.

Part No.	OEM No.	Description
707770	75380	Fuel Stabilizer – 237ml

Engine Maintenance

Radiator Cleaner

Concentrate for cleaning cooling circuits. Deposits in the cooling/heating system create blockages for heat exchange and they also block thermostat valves and control mechanisms. When engine temperatures are too high, the engine runs uneconomically and suffers excessive wear at considerable risk of damage. Removes deposits containing oil and lime and ensures that the engine runs reliably and at the optimum temperature.
Does not contain aggressive acids or alkalis.

Part No.	OEM No.	Description
153284	22106	Motorbike Radiator Cleaner 150ML

Gasket Kleen

707779

Fast acting formula. Quickly removes gasket cement, sealers and paint. Used for the removal of conventional & formed in place gaskets on motors, pumps & flanges.

Part No.	OEM No.	Description
707779	75021	Gasket Remover – 340g

Jump Start Starting Fluid

707776

JUMP START Starting Fluid assures fast, economical starts in cold or humid conditions. Also contains an upper cylinder lubricant to minimize wear during cold starts.

Part No.	OEM No.	Description
707776	75671	Starting Fluid – 312g

Chain & Wire Robe Lube

707780

A blend of synthetic lubricants that penetrate deep to lubricate and protect. Extends the working life of chains and wire rope and reduces wear caused by friction and corrosion. CFIA Accepted.

Part No.	OEM No.	Description
707780	73050	Synthetic Lubricant – 284g

Brakleen Non-Chlorinated Brake Parts Cleaner

734488

The Brake Cleaner to use where compliance calls for a chlorine-free product. Formulated to quickly remove brake fluid, grease, oil, and other contaminants from brake linings & pads.

Part No.	OEM No.	Description
734488	1752253	Non-Chlorinated Brake Parts Cleaner – 397g

Brake Cleaner Non-Chlorinated

The Brake Cleaner to use where compliance calls for a chlorine-free product. Formulated to quickly remove brake fluid, grease, oil, and other contaminants from brake linings & pads.

Part No.	OEM No.	Description
750082	75051PS	Non-Chlorinated Brake Cleaner 510 g

750082

Brake Cleaner Non-flammable

Pro-Series professional brake parts cleaner is formulated to quickly & effectively remove grease, brake dust, brake fluids, & oils from brake systems.

Part No.	OEM No.	Description
750083	75089PS	Brake Cleaner Non-flammable 822 g

750083

Battery Protector

Lead-free, long-lasting red film coating. Protects battery terminals, cables and bulkhead connectors from corrosion, a leading cause of hard starting and battery failure.

Part No.	OEM No.	Description
700990	75046	213 g Aerosol

700990

Battery Cleaner with Acid Indicator

Yellow foaming cleaner instantly detects acid leaks and turns pink upon acid contact. Neutralizes acid and effectively cleans terminals, connectors, cases and hold downs. Penetrates and removes corrosion allowing for maximum current flow.

Part No.	OEM No.	Description
700988	75097	312 g Aerosol

700988

Sta-Plex EP Red Grease

A superior multi-purpose certified lithium complex based NLGI #2 grease. Contains extreme pressure, anti-wear, & anti-oxidation additives. Ideal for high temperature & performance applications. Drop point 500°F.

Part No.	OEM No.	Description
707777	73190	Premium Red Grease – 397g

CRC

Lubricants

Captain PHAB

Lithium General Purpose Grease

A high purity, NLGI Grade 2 lithium based grease. Provides superior lubrication & durability in any weather and most temperatures. It is a versatile grease designed for light duty applications requiring a long grease life. Will not break down or run out.

Part No.	OEM No.	Description
707778	73310	Lithium General Purpose Grease – 397g

MOOVIT

High Performance Penetrating Lubricant

Moovit is blended from the highest quality natural ingredients, uniquely formulated to loosen rusted, seized parts, nuts and bolts with ease. Moovit's capillary action combined with superior lubrication reduces torque and thread wear, requiring less replacement of parts, machinery and equipment. Moovit is user friendly, compatible with all metals, alloys, plastic, rubber and synthetics.

- 100% active ingredients - use less – superior performance - better value
- Fast long lasting lubrication (lasts up to 1 year without evaporation)
- Ensures smooth operation of machinery and fine mechanisms
- Food grade approval Health Canada
- Environmentally friendly

Part No.	OEM No.	Description
703375	11014	Moovit 350 g. Aerosol

LOOBIT

Multi Lubricant & Wire Rope Dressing

Loobit is a multi use, heavy-duty lubricant, formulated for use on rollers, drive chains, wire rope and cables, internal control cables, open gears, exposed bearings, load bearings, load bearing hinges and pivot points, mechanical controls and more. This superior long lasting lubricant leaves a clear protective film impervious to moisture, salt, water, most chemicals and gases. Extends wire cable life up to 40%* by reducing interior friction and displacing moisture.

- Superior long lasting formula
- Withstands high pressures
- Clean, non-tar or creosote formula
- Low viscosity, easy to apply
- Proven by industry for more than 50 years
- Will not attract dust, dirt and abrasives
- User friendly, compatible with all paint finishes

Part No.	OEM No.	Description
703374	31014	Loobit 350 g. Aerosol

Dry PTFE Lubricant

- Goes on wet and dries clear.
- Contains PTFE for superior friction reduction.
- Water and moisture resistant to prevent corrosion.
- Dry form does not transfer to hands, clothing, sails. Non staining.
- Sheds dust and dirt to minimize abrasive wear.
- Ideal for cables, trailer hitches, linkages, sail tracks, awning mechanisms, windows, doors, fasteners, zippers and head plungers PTFE is a registered trademark of Dupont

Part No.	OEM No.	Description
713332	391	Dry PTFE Lubricant - 312 g aerosol

Lubricants & Cleaners

Fogging Oil

- Foaming and strong clinging action ensure thorough coverage
- Displaces and prevents moisture contact with metal
- Extra corrosion inhibitors for longer term correction
- Faster stalling and less smoking
- Greater resistance to "drying out" for a surer, easier restart

Part No.	OEM No.	Description
713314	272	Fogging Oil - 340g aerosol
713252	275	Fogging Oil - 4 l bottle

713314

Chain Case Synthetic Oil

KCL from Kimpex is a 100% synthetic oil, specially formulated for high performance snowmobiling. KCL with ANTI-FRICTION TREATMENT protects your chains and gears from wear caused by friction. When faced with difficult conditions, KCL has excellent stability and protects against optimal oxidation. 100% synthetic. Tested in competition.

Part No.	OEM No.	Description
279380	KCL-75W90-350	Oil for Chain Case 350ml

Lubricant for Crankshafts

This grease must be used on MGT and PTO bearings which are situated in a closed room.

Part No.	OEM No.	Size
277099	004131-221	50 gr
277100	004131-591	400 gr

277099

Brake Parts Cleaner Kleens-It

Kleens-it Brake Parts Cleaner Non-Flammable

Exceptional performance in a truly unique formulation. Cleans and degreases brake parts instantly. Evaporates quickly leaving no residue. Helps to eliminate brake squeal. A value priced product with no compromise to safety and performance. Good for 1000's of other applications.

- Contains no Trichloroethane III
- Non-water base
- Non-flammable
- Very low odour
- High-pressure CO2 Propellant

Part No.	OEM No.	Description
703376	57320	Kleens-it Non Chlorinated Brake Parts Cleaner- 400g. Aerosol

Captain PHAB

Cleaners

Carburetor Cleaner

- Removes gums and varnishes quickly and throughly
- Powerful solvents ensure down to metal cleanliness
- Restores proper engine performance and fuel economy
- Use on metal carburetors only (Not suitable for plastics)

Part No.	OEM No.	Description
713312	301	Carburetor Cleaner - 312 g aerosol

Plastic Plus

See Clear. Makes scratches less visible by sealing the pores of the plastic. Leaves a high quality antistatic film that is smudge & streak free. May be used on clear, tinted, and coloured plastics, lexan, plexiglas, other acrylics and fiberglass.

Part No.	OEM No.	Description
700359	598	Plastic Plus 500ml (16 oz) Sprayer

Aluminum Magic

Acid replacement technology using organic salts with magic results. Professionally clean and strip any bare aluminum with ease and safety. Non regulated. Safe for glass and painted surfaces. Very easy to use and gives professional results. Leaves a bright satin aluminum finish. Dissolves rust and cleans stainless steel.

Part No.	OEM No.	Description
713270	585	Aluminum Magic 670ml (22 oz.) Sprayer

LIQUI MOLY

Visor Cleaner

Universal use for cleaning, care and anti-fogging of glass and plastic visors. Test visor to be cleaned for compatibility. Spray fluid onto surface, allow it to take effect and remove with a damp cloth or sponge. Do not use on hot surfaces.

- Maintains and cleans helmets and visors
- Active anti-fog treatment for glass or plastic visors
- With long-lasting effect. Removes dirt, insects, oil and silicone films
- Provides clear vision and safety

Part No.	OEM No.	Description
153379	22170	Visor Cleaner 100ml

Permatex

The Right Stuff®

- OEM specified by Honda, Nissan and Mazda
- Sensor safe & non-corrosive
- Performs under higher torque loads associated with engines having closely spaced bolt patterns (typical of import vehicles)
- Blowout resistant, allowing leakproof gaskets to be made in just one minute
- Seals instantly, forming a reliable, long lasting elastomeric rubber gasket
- Superior resistance to powertrain fluids including engine oil, transmission fluid, gear lube and coolants
- Temperature range -60°C to 260°C (-75°F to 500°F) intermittent

Applications: Automotive, industrial and marine gaskets, valve covers, gearbox covers, pumps, compressors, oil pans, thermostat housings, water pumps, etc.

Part No.	Description
071373	Gasket Right Stuff® - 147 ML
071372	Gasket Right Stuff® - 300 ML

071373 **071372**

The Right Stuff® Instant Gasket Maker

- OEM specified by Chrysler, Ford, GM and Mercedes-Benz
- Sensor safe & non-corrosive
- Will not contaminate oxygen sensors or corrode other electronic engine components
- Seals instantly, forming a reliable, long lasting elastomeric rubber gasket
- Blowout resistant, allowing leakproof gaskets to be made in just one minute
- Superior resistance to powertrain fluids including engine oil, transmission fluid, gear lube and coolants
- Eliminates the need for pre-formed, pre-cut, paper, rubber or cork gaskets
- Temperature range -60°C to 260°C (-75°F to 500°F) intermittent

Applications: Automotive, industrial and marine gaskets, valve covers, gearbox covers, pumps, compressors, oil pans, thermostat housings, water pumps, etc.

Part No.	Description

Permatex

Sealants

Permatex® Anaerobic Gasket Maker

- OEM specified
- Designed for superior performance on aluminum flanges
- Use for gasketing close fitting rigid-machined flanges with gaps up to 0.25mm (0.01") unprimed; 1.27mm (0.05") with primer
- Eliminates the need for pre-formed, pre-cut, paper gaskets
- Superior resistance to powertrain fluids including engine oil, transmission fluid, gear lube, coolants, gasoline
- High reliability sealing
- Long term durability
- Resists temperatures up to 150°C (300°F)

Applications: Water pumps, thermostat housings, transmission pans, transmission case covers, transaxle casings, o-ring replacement.

Part No.	Description
071375	Anaerobic Gasket Maker - 50 ML

Permatex® Purple Low Strength Threadlocker

- OEM specified
- Low strength threadlocker
- Designed for fasteners 1/4" (6mm) and smaller
- Protects threads from corrosion and prevents vibration loosening
- Removable with hand tools and normal effort
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec (S-46163A) Type II, Grade M

Part No.	Description
071342	Locker Thread Low Strength Purple - 6 ML

071348

071347

Permatex® Blue Removable Strength Threadlocker

- OEM specified
- Removable strength, general purpose threadlocker
- Designed for fasteners 1/4" to 3/4" (6mm to 20mm)
- Protects threads from corrosion and prevents vibration loosening
- Removable with hand tools and normal effort
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec (S-46163A) Type II, Grade N

Applications: Valve cover, oil pan, water pump and drive shaft bolts, rocker arm adjustment nuts, carburetor studs and any similar threaded assembly.

Part No.	Description
071324	Locker Thread Removable Blue - 0.5 ML / Pouch
071346	Locker Thread Removable Blue - 10 ML
071348	Locker Thread Medium Strength Blue - 50 ML
071347	Locker Thread Gel Twist Blue - 10 G

Sealants

Permatex® Green Penetrating Grade Threadlocker

- OEM specified
- Low viscosity threadlocker
- For fasteners ranging from less than or equal to 1/2" (12mm)
- Wicks along the threads of pre-assembled fasteners to secure in place
- Maintenance simplified as threadlocker is applied after parts assembled
- Prevents vibration loosening
- Localized heating and hand tools are needed for disassembly
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec S-46163A Type III, Grade R

Applications: Bolts on alternators, air conditioning bolts and distributor clamps, carburetor adjustment screws, hairline cracks.

Part No.	Description
071357	Locker Thread Penetrating Green - 36 ML
071358	Locker Thread Penetrating Green - 50 ML

071357

071358

Permatex® Red High Strength Threadlocker

- OEM specified
- High strength threadlocker for heavy-duty applications
- Designed for locking fasteners 3/8" to 1" (10mm to 25mm)
- Well suited for permanently locking studs and press fits
- Adds 3000 PSI holding power on slip and press fit assemblies
- Protects threads from corrosion and prevents vibration loosening
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec S-46163A Type I, Grade K
- May require heat or special tools for removal

Part No.	Description
071355	Locker Thread Gel Twist Red - 10 G

Permatex® Red Permanent Strength Threadlocker

- OEM specified
- Permanent, high strength threadlocker
- Designed for locking fasteners 3/8" to 1" (10mm to 25mm)
- Withstands heavy shock, vibration and extreme chemical or environmental conditions
- Protects threads from corrosion and prevents vibration loosening
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec (S-46163A) Type II, Grade O
- May require heat or special tools for removal

Permatex

Sealants

Permatex® Red High Temp/High Strength Threadlocker

- OEM specified
- High temp / high strength threadlocker for heavy-duty applications
- Designed for locking fasteners 5/8" to 1" (16mm to 25mm)
- Withstands severe shock, vibration and heat stress
- Protects threads from corrosion and prevents vibration loosening
- Temperature range: -54°C to 232°C (-65°F to 450°F)
- May require heat or special tools for removal

Part No.	Description
071356	Locker Thread High Temperature Red - 50 ML

Blue Removable Strength Threadlocker

- OEM specified
- Removable strength, general purpose threadlocker
- Designed for fasteners 1/4" to 3/4" (6mm to 20mm)
- Protects threads from corrosion and prevents vibration loosening
- Removable with hand tools and normal effort
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec (S-46163A) Type II, Grade N

Part No.	Description
915052	Blue Removable Strength Threadlocker

Red Permanent Strength Threadlocker

- OEM specified
- Permanent, high strength threadlocker
- Designed for locking fasteners 3/8" to 1" (10mm to 25mm)
- Withstands heavy shock, vibration and extreme chemical or environmental conditions
- Protects threads from corrosion and prevents vibration loosening
- Temperature range: -54°C to 150°C (-65°F to 300°F)
- USA Mil-Spec (S-46163A) Type II, Grade O
- May require heat or special tools for removal

Part No.	Description
915054	Red Permanent Strength Threadlocker

Permatex

PermaPoxy™ 1 Minute Clear Epoxy

- Easy to use 2-part dispensing syringe
- Fills cracks and bonds dissimilar materials
- Can be drilled, machined, filed & painted
- Better choice than super glues for bonding parts with larger gaps
- Resists most liquids including fuels and solvents
- Clear appearance
- Sets in 1 minute
- Permanent strength - up to 2500 PSI
- Temperature range: -51°C to 150°C (-60°F to 180°F)

Applications: Auto trim parts, knobs, cracked taillights, fills cracks, ceramic, chrome, fabric, fiberglass, glass, hard plastic metal and rubber.

Part No.	Description
071382	PermaPoxy™ 1 Minute Clear Epoxy - 25 ML

PermaPoxy™ 5 Minute General Purpose Epoxy

- Fast setting epoxy in an easy to use 2-part dispensing syringe
- Better choice than super glues for bonding parts with larger gaps
- Can be drilled, machined, filed & painted
- Resists most liquids including fuels and solvents
- Clear appearance
- Sets in 5 minutes
- Permanent strength - up to 3400 PSI
- Temperature range: -51°C to 82°C (-60°F to 180°F)

Applications: Auto trim parts, knobs, cracked taillights, fills cracks, ceramic, chrome, fabric, fiberglass, glass, hard plastic metal and rubber.

Permatex

Epoxy

PermaPoxy™ 5 Minute Plastic Weld

- Fast setting epoxy in an easy to use 2-part dispensing syringe
- Better choice than super glues for bonding parts with larger gaps
- Can be drilled, machined, filed & painted
- Resists most liquids including fuels and solvents
- Cream appearance
- Sets in 5 minutes
- Permanent strength - up to 3500 PSI
- Temperature range: -51°C to 121°C (-60°F to 250°F)

Applications: Bonds most plastic, interior trim, fills cracks, plastic to vinyl, ABS, acrylic, fiberglass, glass, PVC, steel, styrene, vinyl, wood.

Part No.	Description
071381	PermaPoxy™ 5 Minute Plastic Weld - 25 ML

Pit Crew's Choice™ Contact Cement

- Tough, permanent bond on contact
- Instantly bonds metal, wood, ceramic, leather, rubber and many other surfaces
- Bonds leather and vinyl to metal
- Heat and water resistant
- No clamping required

Applications: Weather stripping, rubber mats, carpeting, metal, wood, ceramic, leather, rubber and many other surfaces.

Part No.	Description
071371	Pit Crew's Choice™ Contact Cement - 44 ML

Ultra Bond™ Super Glue Gel

- Gel formula super glue
- Superior performance and strength
- Gel formula works better on more porous materials
- Will not drip or run, it stays where it is applied
- Fast setting, strong adhesive for bonding most materials
- Better choice than epoxies for bonding parts with little or no gap
- Makes durable, clear bonds
- Temperature range: -54°C to 82°C (-65°F to 180°F)

Applications: Rubber, metal, wood, ceramic, porcelain, leather, vinyl, paper, cork, fabric, most plastics.

Part No.	Description
071364	Super Glue Gel - 2 G

Fuel Containers & Transfer Pumps

Gas Containers

Scepter's patented "Spill-Proof Spout" is designed to eliminate spillage through a self-venting spout that provides an automatic shut-off feature that engages when the fuel tank reaches capacity. This dual functionality significantly reduces the amount of potential organic gases that escape from traditional gas cans. The result: less smog-forming pollution leading to a healthier environment.

Part No.	OEM No.	Description	Dimension
660346	07081	5L Jerry Can (1 Gal)	7 3/4" H x 8 1/2" W x 10" D

TERA PUMP

Manual Fuel Transfert Pump

- Fits Most North American Fuel Plastic Cans with 3 different adapters size (included)
- Flow rate: up to 3.2 gallons a minute / Package Size: 29" x 6.5" x 2.5" / Intake hose: 16.5" / Outtake hose: 26" / Weight: 9.5 oz
- Unique bendable suction tube system / Great for occational use with small siphoning jobs
- Compatiable Liquids: Water (not for drinking water), Gasoline, Diesel, Anti-freeser, Light Oil, Soaps, Chemical insectisides, Detergent, Deodortants, Mild Acids, Wax, etc.

**** Can not inclued***

Part No.	OEM No.	Description
302245	20004	Manual Fuel Transfert Pump TRM20

Segmented Drum Pump

- Flow rate of up to 5.5 Gallons per Minute
- Discharge Hose Length of 47.2 inches
- Suction Tube Length of 34.4 inches
- BPA-Free, Safe for with Drinking Water
- Detachable Portable Segments
- Portable: Breaks down for easy storage and portability
- Air Vent Cap: Created vacuum from liquid transfer when tightened. Releases vacuum to stop transfer
- Quick Siphoning: Drains up to 1 Pint per 3 Strokes
- NPS Adapter: Comes standard with a 2" NPS bung adapter
- No Electricity Required: Utilizes siphon action to transfer liquids by a simple grip and pump
- Fits Various Drum Barrels: Built-in drum bung adapter fits various drum barrels for vacuum
- Compatible Liquids: Petroleum products, light oils, kerosene, diesel oils, toluene, deodorants, corrosives, chemical insecticides, soaps, detergents, mild acids, antifreeze, liquid waxes, thinner gasoline & drinking water

Battery Powered Pump

- Pumps up to 2.5 gallons per minute
- Lightweight and portable
- For small cans and quick refueling jobs
- Operates on 2 AA batteries

Part No.	OEM No.	Description
302251	20039	Battery Operated 2AA Pump

Battery Powered Pump, Auto-Stop

- Flow Rate of 2.4 Gallons per Minute
- Intake Tube Length: 15.5 inch
- Discharge Hose Length of 18 inch + 5.5 inch Nozzle
- Battery Loading Slot: Simple Slide off mechanism
- Simple Power Switch: Switch to on and you're ready to go
- Auto-Buzzer: Sounds when pump Automatically stops
- Auto-Stop Sensor Mechanism: Pump warns when it is at capacity, protecting from leaks and liquid overflow
- Delivery Volume: 10 Quarts / Min or 2.4 Gallons per Minute. Increased suctioning power with impeller head
- Application Liquids: Any Non-Corrosive Liquids such as gasoline, kerosene, diesel, light oils & non-potable water

Battery Powered Fuel Transfert Pump

- Improvements and Updates: Longer hose (25" to 35") / More Poweful Motor (20% up) / Fuel More Resistant Plastics
- Size: 14 x 6 x 3.5 Weight: 1.2LB / Transfer to several outlets like gas can / vehicle/ lawn mower so on!
- 3 gallons per min / Requires 4 AA batteries (which are not included) / Flexible Intake hose / No-spill Auto-Stop Nozzle
- Fits Most North American Fuel Plastic Cans with 3 different adapters size (included)
- INo Mess No Worries No Hassle - Sit Back and Relax!

**** Can not inclued***

Part No.	OEM No.	Description
302244	20000	Battery Powered Fuel Transfert Pump TRFA01

Battery Powered Fuel Transfert Pump, Racing Edition

TRFA01-XL is a battery powered fuel transfer pump with extended intake and discharge hoses. It eliminates the lifting of large, heavy, gas cans and spilling wasted fuel. The built-in advanced auto-stop feature automatically stops when the transfer process is complete so you just sit back and watch it work!

Applicable liquids: Gasoline, diesel, kerosene

- Pumps 3 gallons per minute
- Powered by 4AA batteries (not included)
- Auto-stop eliminates overflows
- 1 racing/utility jug adapter and 3 standard gas can adapters included
- Extended 23.6" intake and 51" outtake hoses

**** Gas can and AA batteries are not included ****

Part No.	OEM No.	Description

TERA PUMP

Electric Pail Pump

The TRPAIL is an electrically powered pail pump to transfer motor oil, hydraulic fluid, and other liquids from 5 gallon pails. With a powerful DC motor the TRPAIL can discharge liquids up to 4 gallons per minute.

TREP Features:

- Applicable liquids: Motor oil, hydraulic fluid, gasoline, diesel, DEF(AdBlue), water, kerosene, antifreeze, windshield washer fluid, mild detergents, agricultural chemicals
- Pumps up to 4 gallons per minute (Oil 1.3 GPM)
- Flow control quick-stop safety nozzle
- Telescopic to fit larger bukets and pails up to 22 inches in height
- Powered by 110v AC plug-in

Part No.	OEM No.	Description
302265	20078	TRPAIL Electric Pail Pump

Electric Pail Pump and Oil Meter

- Flow Rate of 4.5 Gallons per Minute | Includes One Pail Lid
- Intake suction tube length of 15.87 inch to 22 inch
- Discharge Hose Length of 73.5 inch + 11.5 inch Nozzle
- Includes One Pail Lid & 35L Oil Meter: Precise measurement within (+-) 0.5%
- Flow Control Nozzle to control the flow
- Compatible Liquids : Engine oil, hydraulic oil, gasoline, diesel, DEF (AdBlue), kerosene, antifreeze, agricultural chemicals, mild detergents & non-potable water

Part No.	OEM No.	Description
302374	20107	Electric Pail Pump and Oil Meter TRPAIL-M

Battery Powered Pail Pump & Oil Meter

TRPAIL-M-B is a metered battery powered pail pump to transfer motor oil, hydraulic fluid, and other liquids from 5 gallon pails. With a powerful DC motor the TRPAIL can discharge liquids up to 4 gallons per minute.

- In-hose digital flow meter (meter only accurate for engine oil & hydraulic fluid)
- Applicable liquids: Engine oil, hydraulic fluid, gasoline, diesel, DEF, agricultural chemicals, kerosene, antifreeze, windshield washer fluid, mild detergents
- Pumps up to 4 gallons per minute (Oil 1.1 GPM)
- 6' Discharge Hose
- Lid included
- Flow control quick-stop safety nozzle
- Telescopic to fit larger buckets and pails up to 22 inches in height
- Powered by rechargeable lithium-ion battery

302372	20153	Chemical Drum Transfer Pump TREDRUME-CH-B
302373	20154	Chemical Drum Transfer Pump TREDRUME-CH-M-B

Telescopic Electric Drum Transfer Pump

- Flow Rate of 7 Gallons per Minute
- Suction Tube fits 55 Gal Drums to 275 Gal IBC Totes
- Includes a 2" NPT to 2" Buttress adapters
- Filter-equipped intake end protects the motor from damage
- Discharge Hose Holster: Built-in nozzle holder for safe and convenient way of storing the discharge nozzle
- Big Flip Switch: Big On/Off Switch with LED light
- High Speed & Heavy Duty Electric Drum Pump
- 110V Plugin Adapter included
- Compatible Liquids : Diesel, DEF(AdBlue), non-potable water, kerosene, antifreeze, windshield washer fluid, mild detergents, agricultural chemicals & light oils

CAUTION: *Not use with Drinking Water, Flammable liquids or Concentrated Acids*

RotopaX Brackets (Pack Mount)

The quickest, strongest way to mount your RotopaX.
Use with included base plate or remove plate to attach mount direct by bolting up through the bottom or down through the top.

Part No.	OEM No.	Description
175114	RX-PM	Pack Mount
175115	RX-DLX-PM	DLX Pack Mount
175116	RX-LOX-PM	LOX Pack Mount
175117	RX-DLX-T	DLX T-Handle
175118	RX-LOX-T	LOX T-Handle
175119	RX-EXT	Pack Mount Extension - Use in conjunction with a pack mount (RX-PM, RX-PM-DLX, RX-PM-LOX)
175143	RX-3EXT	Extension for 3 Gallon Pack
175313	RX-STD-T	STD T-Handle
175338	RX-1.75EXT	Pack Mount extension - 1.75 gallon

Base Plates

The quickest, strongest way to mount your RotopaX
Never run out of fuel again! Use with our 1, 2 or 1.75 gallon packs.

Part No.	OEM No.	Description
175360	RX-PS	Polaris Base Plate
175361	RX-SD	Ski-Doo Base Plate

RotopaX Mounting Plates

Single Mounting Plate

Similar to the Universal Mounting Plate (which was designed for mounting 2 gallon combos and 4 gallon packs) but made for convenient mounting of 1, 1.75, 2 single and 3 gallon packs.

Part No.	OEM No.	Description
175157	RX-SMP	Single Mounting Plate

L-Bracket

Heavy-duty, powder coated steel L-Bracket with hardware.
8 gauge (.172") steel

Part No.	OEM No.	Description
175342	RX-L	L-Bracket

Picture shown with standard pack mount. (Pack mount not included)

Universal Mounting Bracket

Powder coated steal universal mounting plate easily attaches to: ATV rack, UTV frame, trailer wall, etc. Perfect fit on Polaris Ranger!

24" x 7" x .078" (14 gauge)

Part No.	OEM No.	Description
175341	RX-UP	Universal Mounting Plate

Backing Plate

Powder coated steal backing plate used to strengthen installation of RotopaX pack mount to plastic boxes, etc.

5.5" round, 16 gauge (.063")

Part No.	OEM No.	Description
175122	RX-BP	Backing Plate

SCEPTER™

Funnels

Scepter's complete line of funnels are perfect for all your boat engine and automotive uses. Manufactured from quality, high-density polymers; they won't rust, dent or crack. This means, no drips & leaks for you to clean up after you've tuned-up.

- Made from tough, high-density polypropylene
- Great for gas / oil mix 2-cycle engines need
- Stabilizing handle on all standard funnels conveniently allows for smooth steady pourin
- A size for every need with standard funnel options from 4" to 8" (100mm to 200mm) in diameters

Part No.	OEM No.	Description
742024	03590	3 Funnel Assortment

KIMPEX

Mix Oil to Gas Measuring Bottle

Accurately measures the correct oil to gas mixture for all 2-cycle engines. Mixtures of 24:1, 33:1, 40:1, 50:1 and 100:1 ratios are shown on the see through bottle for accurate measuring in both liters and gallons.

Part No.	OEM No.	Description
400619	52615	Mix Oil to Gas Measuring Bottle

BITEHARDER
TUNING YOUR POWERSPORTS PASSION

Track Tools

Carbide Runner Sharpening Tools

- Sharp edges provide improved control, handling and performance in all conditions
- Better control of your snowmobile results in a much safer ride with less darting
- Bite into any surface for the best ride in all conditions including hard pack, ice and even asphalt
- BITEHARDER sharpening tools with AdvantEdge™ Technology provide the best;
  - Edge in handling and performance
  - Sharp carbide edge over the life of your runners
  - Precision and accuracy through the corners
  - Control of your machine for the safest riding in all conditions

Standard Series

Our standard series tools are designed to be used with a portable drill for anywhere sharpening convenience (trailside, trailer or garage)
With proper use our industrial diamond cutting media allows you to maintain your carbide runners edge over their entire useful life.

Part No.	Description
070247	Série standard

Professional Series

Our Professional Series Tools operate similarly to our Standard Series Tools but are designed to operate at much higher RPM's (10,000 minimum), using pneumatic or electric grinders. These tools use superior quality diamond cutting media which provide for longer life (up to five times longer than our Standard Series Carbide Runner Sharpener), making it perfect for families with numerous machines and/or dealer service departments wanting to provide a sharpening service for their customers.

Part No.	Description
070248	Professional Series

STUD BOY

Pro Series Backer Installation Tool

The new Pro Series Backer Installation Tool is a must have tool for installing the new Pro Series Backers. This aluminum tool is designed to hold the single Pro Series Backers while installing the studs. The tool allows you to safely apply pressure to the backer and also keep the backer oriented properly for optimum results. While this tool is not designed specifically for the Pro Series Double Backers, it does help when applying pressure to start both studs in the backer.

Part No.	OEM No.	Description
996303	2521-00	Pro Series Backer Installation Tool

Clutch & Alignment Tools

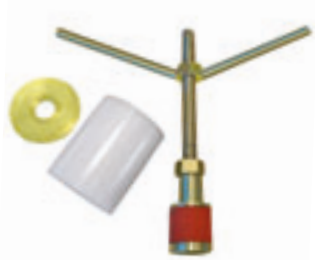
STRAIGHTLINE PERFORMANCE

QRS Clutch Compression Tool

- Simple and effective way to compress the secondary for helix and spring removal on all Ski-Doo QRS clutches without removing the entire jackshaft
- Uses a safe, rubber-style expandable bushing for internal threaded machines
- Can be used on both inner thread and outer thread secondary
- Can install in seconds, no threading required

Part No.	Description
384239	QRS Clutch Compression Tool

QRS Helix Removal Tool



The tool can compress the clutch with out removing the entire jackshaft. Can be used on both the inner thread and outer thread secondary. Uses a safe rubber style expandable bushing for internal threaded machines. Can install in seconds, no threading required.

Part No.	OEM No.	Description
301785	151-107	QRS Helix Removal Tool

QRS Shim Kit

- Works on all 2008-16 XP/XS/XM Models
- Allows the QRS jackshaft assembly to be shimmed out for precise alignment
- Easy installation
- Comes complete with all necessary shims

Part No.	OEM No.	Description
301771	121-211	QRS Shim Kit

Clicker for Quick Calibrate

Straightline's Quick Adjust Clickers allows for changing of the clickers in seconds. Just push and turn to your next clicker position. Will work on all TRA clutches and installs in minutes.

Part No.	Description
301432	Clicker for Quick Calibrate

Clutch Spring Compressor

- Removes all primary and secondary clutch springs.
- Works on all Arctic Cat, Polaris, Ski-doo, Yamaha, Primary and most secondary's, including TEAM.
- Removes Arctic Cat Diamond Drive Springs.
- Can bolt directly to bench or fit in any standard vise.

Circuit Testers & Voltmeter

KIMPEX

Universal Battery Voltmeter

Voltmeter with small LED display is indicating the tension of your battery in real time. It shows you if your electrical system is not charging your battery it gives you an immediate warning if your voltage regulator rectifier is defective and is frying electronic components on your vehicle. Do not worry anymore about leaving for your ride with a low charged battery.

- Easy installation, only two wires to connect and a 3M adhesive pad to fix the voltmeter
- Lightweight
- Indicate voltages between 11V-16V
- Waterproof anodized black plastic case
- Can be attached to almost all components of your vehicle, including your steering wheels

Part No.	Description
289034	Universal Battery Voltmeter

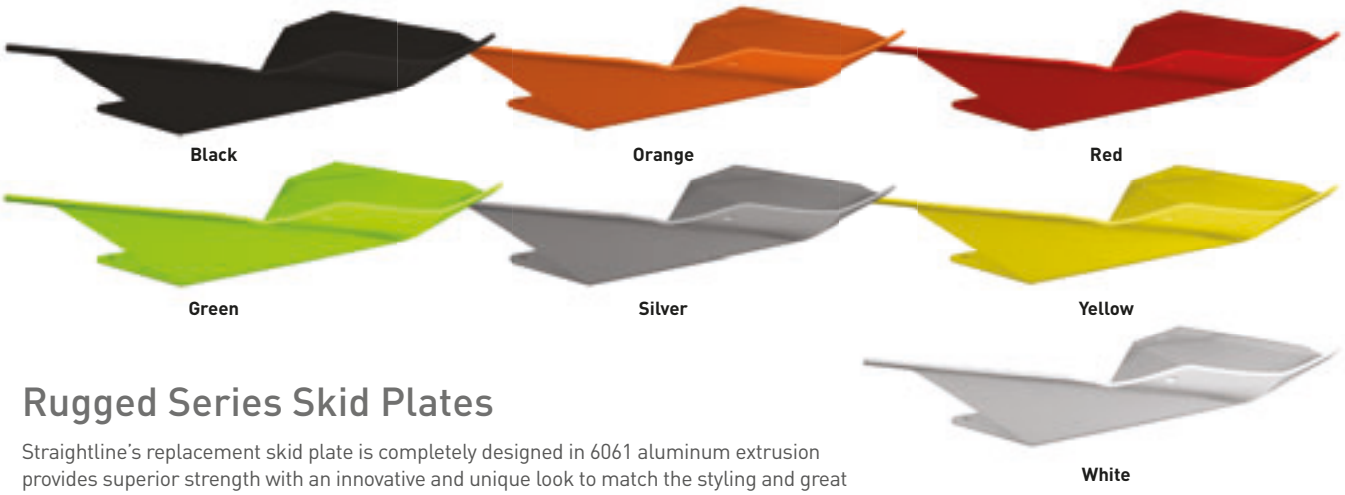
Skid Plates & Brake Reservoir Protectors

STRAIGHTLINE PERFORMANCE



Rugged Series Skid Plates

Straightline's replacement skid plate is completely designed in 6061 aluminum extrusion provides superior strength with an innovative and unique look to match the styling and great lines of today's machines.
Designed to offer additional protection from trees, rocks, and other unexpected obstacles and are a must for those of you who like to play off-trail.

- Double wing HD
- Maximum impact protection
- High-end, black powder-coat for a long-lasting finish
- Easy to install

ITEK INDUSTRIES

Brake Reservoir Protectors

- Designed to protect Ski-doo brake oil reservoir number: 507032478. No modification required for the installation. Replaces top bar clamp of the brake handle assembly.
- Anodized finish: A coloring process that gives it a metallic like appearance. Please note that color matching with the snowmobile's OEM color will only be obtained with the "Powdercoat" finish.
- Powdercoat finish: A finish achieved by applying a dry powdered paint compound. Gives the appearance of paint without metallic sheen. Allows you to match the color with the snowmobile's OEM color.

- The ESR (Ergonomic Seat Riser) kit takes you to the next level of comfort and control. The rider forward design of the Rev was a great leap forward, but as we all know, the seat level is just a little low. This puts an unnecessary strain on your knees and back. The E.S.R. kit combines additional pre-cut foam with a gripper-style seat cover.
- The additional height eliminates knee and back fatigue and improves control by allowing you to stand more comfortably for powder or bad trails
- Installation is easy. Remove your seat (5 minutes), remove the staples holding on your old cover, insert the foam and recover with the new E.S.R. cover and re-install the seat.

FrogzSkin

FrogzSkin Vents are the newest technology in engineered intake and cooling vents. Their Patent Pending design produces a thin flexible OEM looking vent that can be applied to most any contoured or curved surface. FrogzSkin's manufacturing process utilizes the latest technology in Micro-Fiber materials. Woven to specific quality standards allowing maximum air-flow and hydrophobic characteristic to repel water and snow. Industrial grade adhesive, tested in excess of -40F, are used to meet the demanding requirements of the aftermarket and OEM manufacturers.

FrogzSkin's Universal Kits can be used in multiple locations, in combination with multiple sizes or model specific kits to maximize cooling airflow

FrogzSkin's model specific Nose Vent kit designs allow air-flow to reduce the power robbing under-hood heat from building up all while keeping out snow and debris. Virtually eliminating the heavy snow and ice build up in the nose and belly pan. FrogzSkin's Patent Pending design produces a thin low profile vent that will not catch or entrap snow and debris. No unsightly rivets, screws, snaps or bulky frame works. Industrial grade adhesives allow a fast and easy peel-n-stick application.

FrogzSkin's open design increases airflow to reduce performance loss due to heat saturation. Clutches run cooler for better performance and improved belt life. Exhaust side vents allow heat to escape and not build up under the hood.

FrogzSkin's work with the plastic OEM vents to protect from fine powder snow and debris. Ideal for deep snow conditions providing easy and economical protection the looks great! MADE IN THE USA
